MR. SHELF

FOR SMARTER STORAGE SYSTEMS & SOLUTIONS

At Mr Shelf we understand storage systems and with over 30 years of experience in the field, we have provided a vast range of solutions to businesses of all sizes.

Our range of products and solutions cater for small companies looking for shelving units or a light duty rack to organisations requiring more integrated high bay automated racking solutions, new mezzanine floors to optimize an area or high density filing systems to maximize a space. If your need is in manufacturing, distribution, retail, wholesale or cold storage, we will design a solution for you.

The demands for efficient material handling, product logistics, optimal use of space, maximum flexibility in locating, storing and retrieving stock, are continuously pushing warehousing solutions toward new frontiers.

Optimizing your storage space requires more than just a system. It needs an integrated solution to address your current and future requirements and growth – smart solutions that are cost effective, user friendly and will make

a real difference in your business performance.

If you are you looking for a solution to simplify your storage requirements, optimize your warehouse space, reduce stock damages, increase stock flow efficiency, improve product rotation and management, or to resolve your filing headache, call us and speak with one of our experienced and knowledgeable consultants.

Our services include:

- ▶ CAD design proposals & quotations
- ▶ Professional installations & site supervision
- ▶ Project management
- ▶ After sales support

Our core objective at Mr Shelf is by providing a multitude of different storage systems, products and solutions designed to suit your unique business needs.

We have branches in Johannesburg, Pretoria, Durban, Port Elizabeth and Cape Town with representatives nationwide.

We look forward to making your space work for you.

MAKE YOUR SPACE WORK FOR YOU.

INDUSTRIAL MOBILE SHELVING

This range of Industrial Mobile Shelving is available with 3 movement options:

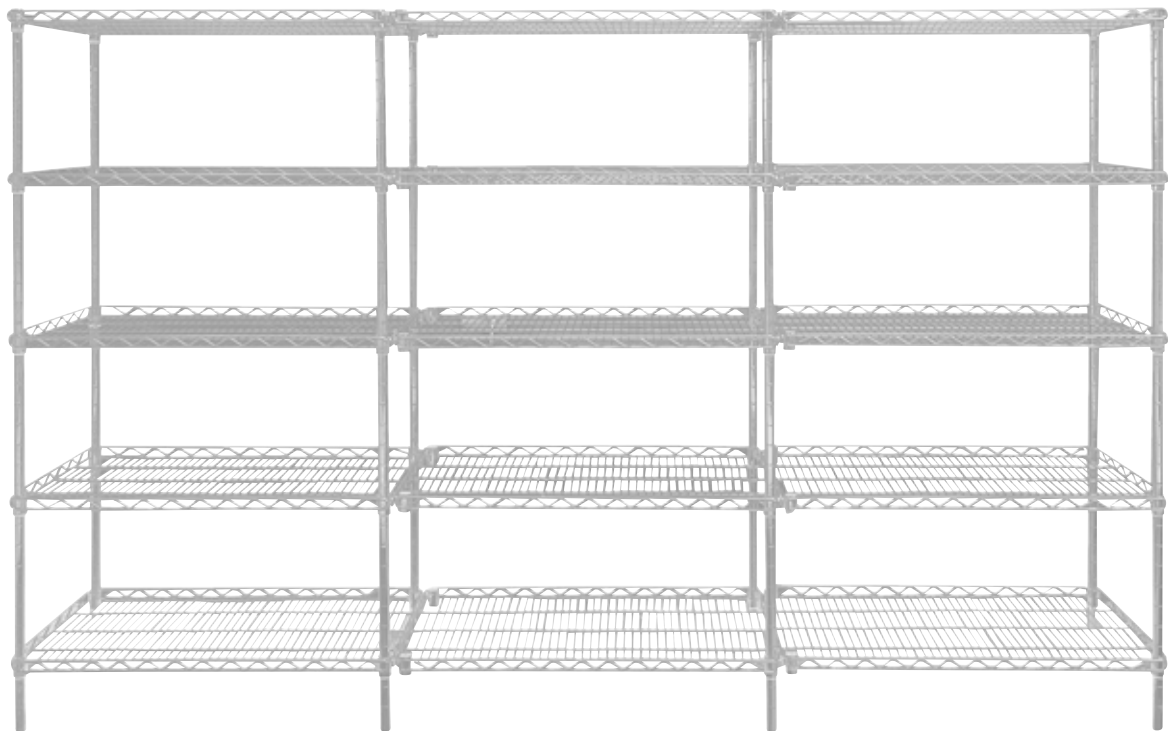

- Manual operation
- Mechanical operation
- Electronic operation

Durable, high-performance solutions are designed to maximise your storage space and are customised to fit a wide range of applications.

WIRE SHELF

A unique hi-tec wire shelving system which is attractive, versatile and user-friendly.

- Large selection of shelf designs and sizes
- Uprights available in 100mm increments from 100 mm to 2.5 m
- Shelves are height adjustable in increments of 50 mm
- Can be delivered in knockdown form
- Available in a variety of finishes - including Chrome-Plated, Galvanised and Powder Coated

Assembly detail:

The uprights which have grooves at 50 mm increments are fitted into the tapered collars welded in the corners of shelves.

- A plastic split-cone is fitted over the upright at the desired height
- The tapered collar in the shelf is fitted over the tapered split cone to form a secure union

S Connectors

- Allow you to add on to 1st bay using common upright

Rectangular Shelves

- Lip can be up or down

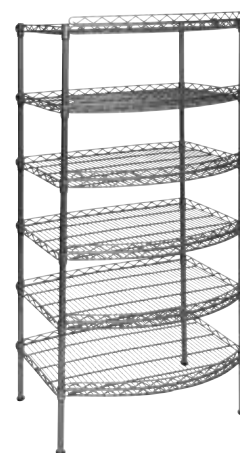

1200 mm x 450 mm	600 mm x 600 mm
1200 mm x 350 mm	600 mm x 450 mm
900 mm x 450 mm	600 mm x 350 mm
900 mm x 350 mm	600 mm x 275 mm
800 mm x 300 mm	

Curved Front Shelves

- Curved Front Shelves are measured at the widest point of the curve
- Ideal for snacks
- Gondola ends

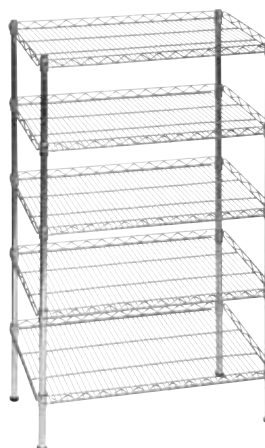

1200 mm x 550 mm (Front) x 450 mm (Sides)
900 mm x 550 mm (Front) x 450 mm (Sides)
900 mm x 450 mm (Front) x 350 mm (Sides)
600 mm x 420 mm (Front) x 350 mm (Sides)
450 mm x 400 mm (Front) x 350 mm (Sides)

Downslope Shelves - Flat Angle

- 100 mm angle back to front
- Ideal for bread, cakes, confectionery, wicker baskets

GONDOLA SHELVING

Functionality and versatility make gondola shelving easy to install with the ability to change your displays at any time. With a variety of shapes, sizes, and styles to choose from, Gondola shelving creates a storefront that is appealing to consumers, and it allows you to utilise every inch of usable space in your store.

BIN DISPLAY SYSTEMS

Our wide range of quality Bin Displays Systems, ideal for picking and as visual displays, are available with a variety of different bin sizes and colours to suit your needs. The adjustable pine tops are ideal for additional storage space and to minimise dust distribution.

Features

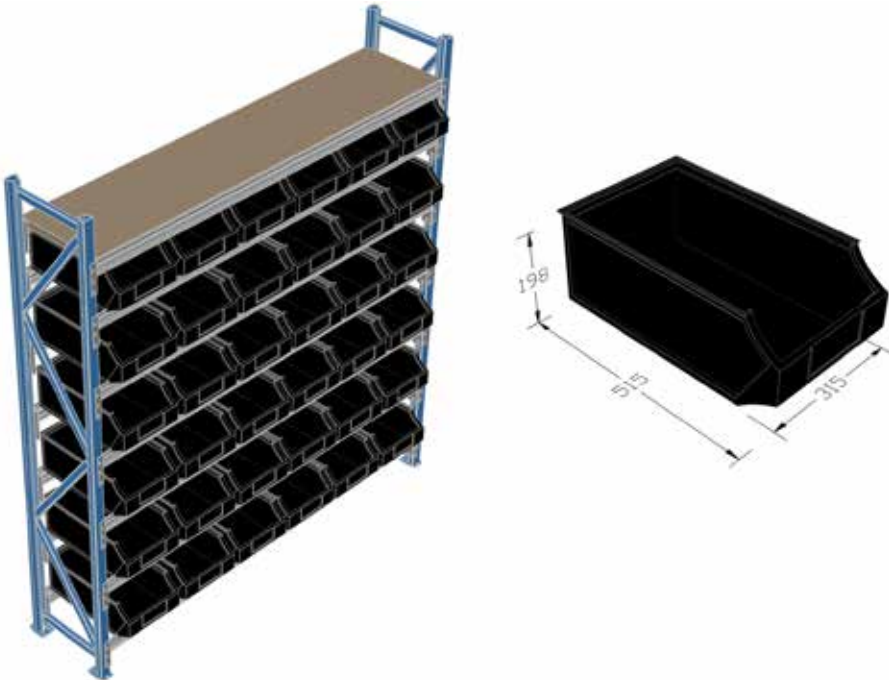

- Fully adjustable beam levels
- Custom designed systems to suit your requirements
- Variety of bin sizes and colour combinations available
- Accommodates medium to heavy loads
- Durable

STATIC PALLET RACKING & ACCESSORIES

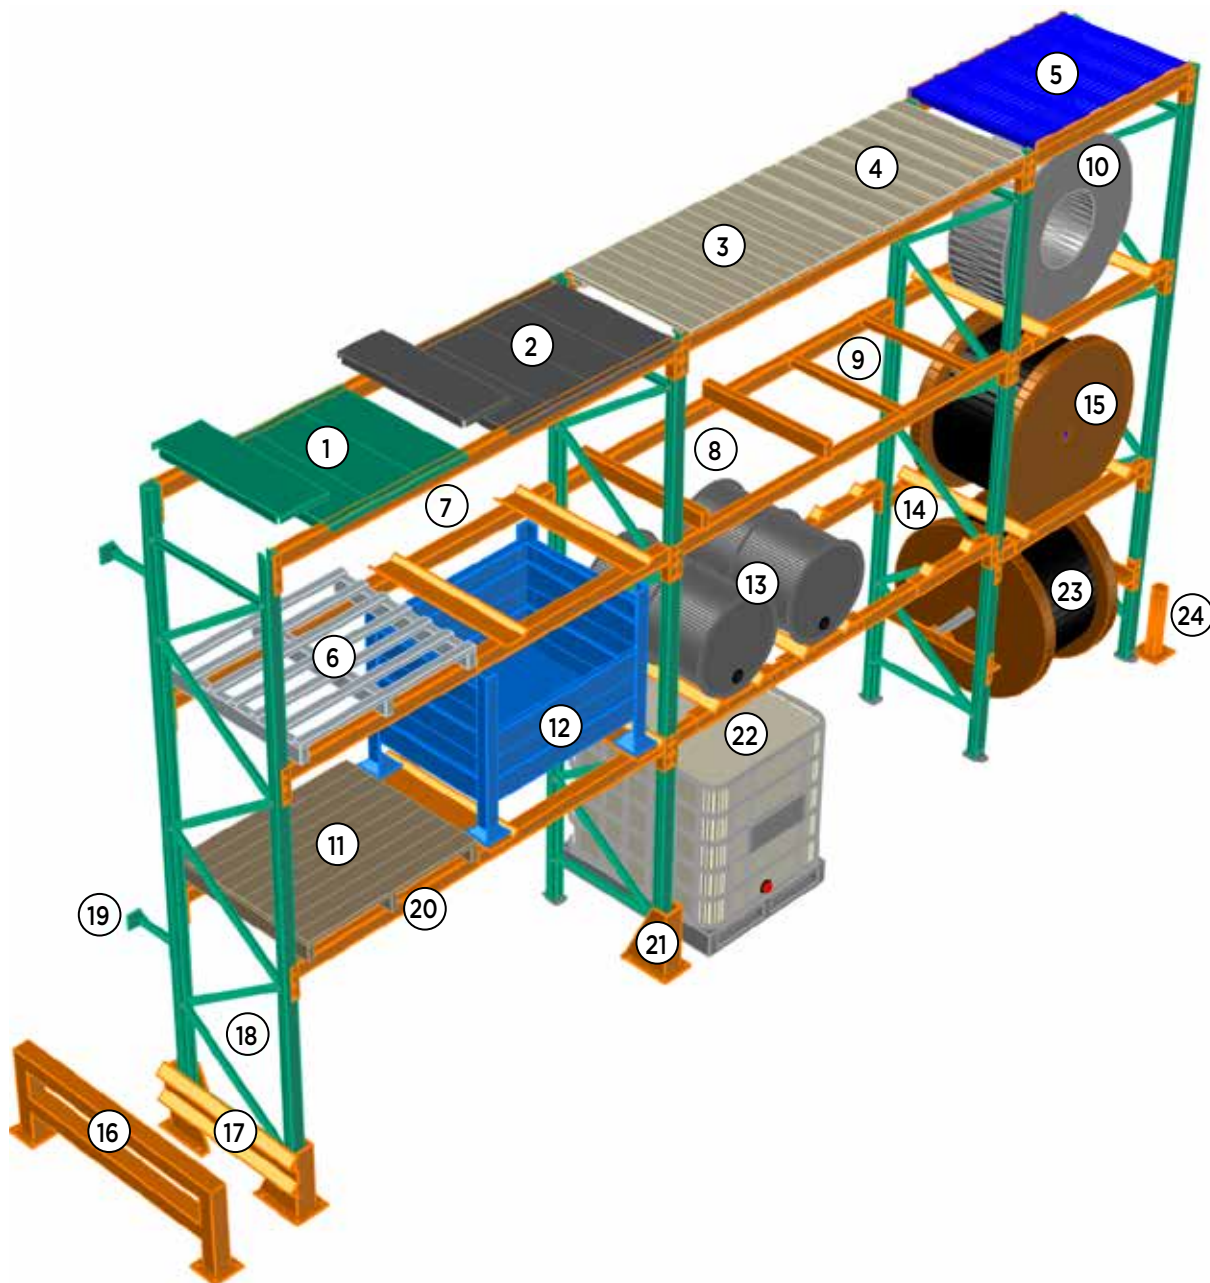

This racking system allows full selectivity and speed of operation which is the main objective. Pallets are fully accessible allowing easy access by Forklift or Reach Truck.

A vast variety of beam and frame sizes are available, each graded to your specific requirements. Beam levels can be easily adjusted to suit your specific pallet height. Safety accessories include Upright and Row End Protectors, which ensure additional protection and safety. Racking can include Drum cradles, Pre-Galvanised or Powder Coated Steel Decks, Timber Decking and Skid Channels.

The Static Pallet System

- Random Access
- Total Space Utilisation - 60%
- Selectivity - Random Access, High Volume
- Space vs. Economy - Good
- Maintenance Costs - Low
- Direct Access to Goods - 100%
- System Finish - Powder Coated or Pre-Galvanised

- Heavy Duty

DRIVE-IN STORAGE RACKING

Drive-in Storage Racking is a low cost high density pallet racking system.

This system is ideal for bulk loaded goods with a low number of product lines and is ideal for first in, last out storage requirements. The design is very cost effective. Goods are stored in block systems, usually two blocks serviced by one operating aisle. Pallets are stored in deep lanes. Floor mounted Guide-rails assist drivers to accurately position their pallets/loads in these lanes.

This system ensures the maximum use of warehouse space. This system is safe in all conditions at ambient or freezer temperature. Goods can be accessed by forklift or reach trucks.

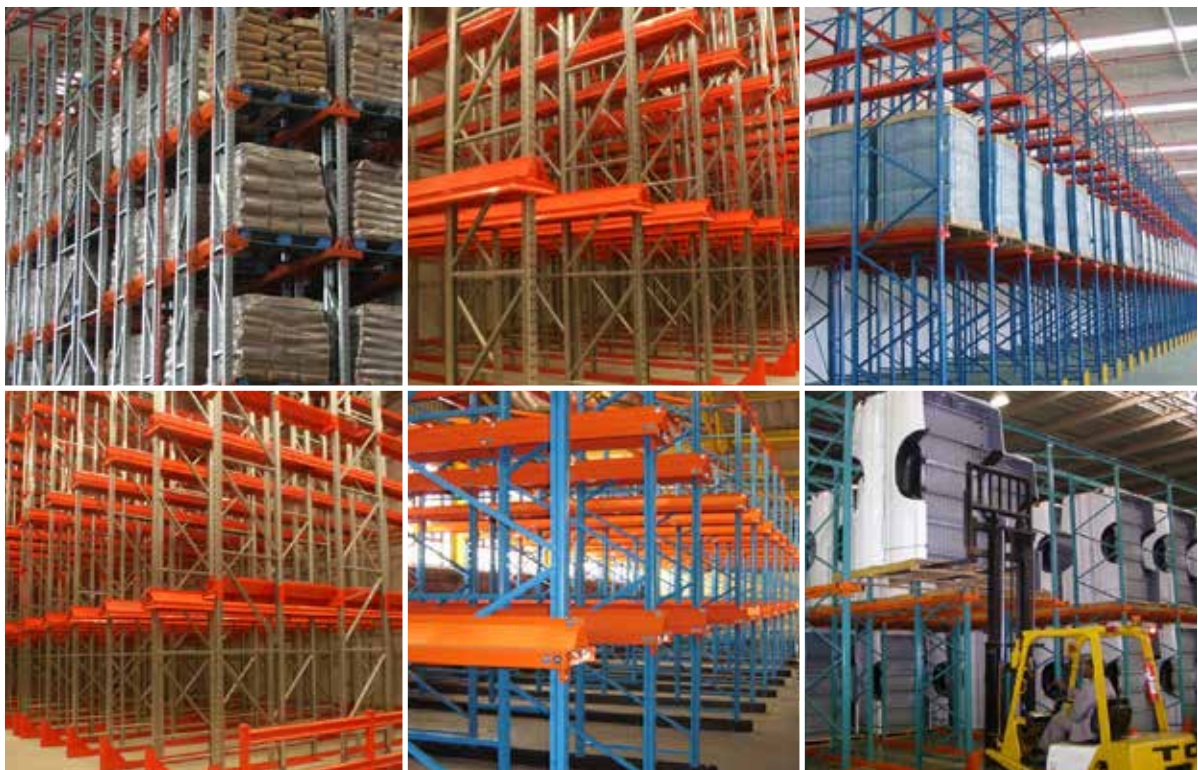

Storage Method

Reach trucks drive into floor mounted guide lanes between a side supported rail system to accommodate pallets which can be stacked up to 10 metres in height and between 4 and 5 pallets in depth. Pallets can even be stored up to 10 pallets deep. This system has a very low access and rotation of goods. Lanes are designed to accommodate the correct pallet load and reach truck specification, ensuring safety and economy.

Applications and advantages

Ideal for cold rooms, freezer rooms & ambient storage applications. Good for high density storage with fewer product lines. Using this system prevents damage by avoiding crushing.

This system is designed for your specific storage application.

CANTILEVER STORAGE RACKING

Cantilever Racking is designed to allow for instant access to one piece or a full load and can be adapted for light to heavy loads.

Adjustable cantilever load bearing arms extend from vertical columns and is easy to assemble. Modular construction for any type of commodity and a practically unlimited load range. Applications include storage for piping, steel bars, timber sections, roof cladding, furniture, extrusions and even vertical coils. Goods can be accessed by forklift or reach trucks.

Cantilever Racking Features

- Random access
- Total space utilisation - 60%
- Direct access to goods - 100%
- Maintenance costs - low
- Designed to meet individual requirements
- Economical
- Mechanical cantilever arm option
- System finish - powder coated

- Long tubes/PVC pipes
- Long timber sections
- Uneven boards
- Roof sheeting
- Cladding
- Steel coils/cable
- Steel plates
- Aluminum sections

Storage Applications

- Light medium & heavy duty goods
- Indoor and outdoor use
- High bay or multi-tier

Materials Handling

- Forklift
- Stacker
- Overhead crane (use of sling or pallet fork)

PUSH-BACK STORAGE RACKING

Push-Back pallet rack systems are designed around the principle of organising space by depth rather than width. This depth arrangement greatly increases storage density. Each bay can be loaded with the option of two to six pallets deep with each pallet stored on wheeled carts or trolleys that fit onto rails. The rails are slightly angled to take advantage of gravity. When a forklift places the pallet onto the cart, the forklift driver drives forward and causes the pallet to push the other pallets in the lane backwards.

When removing a pallet from the front position the remaining pallets immediately stage themselves forward so that the next available pallet can be accessed. Push back rack is a LIFO (last in, first out) storage system.

Conventional handling equipment can be used. Pallet quality may not be too critical as carts or cradles are used to nest all the stored pallets.

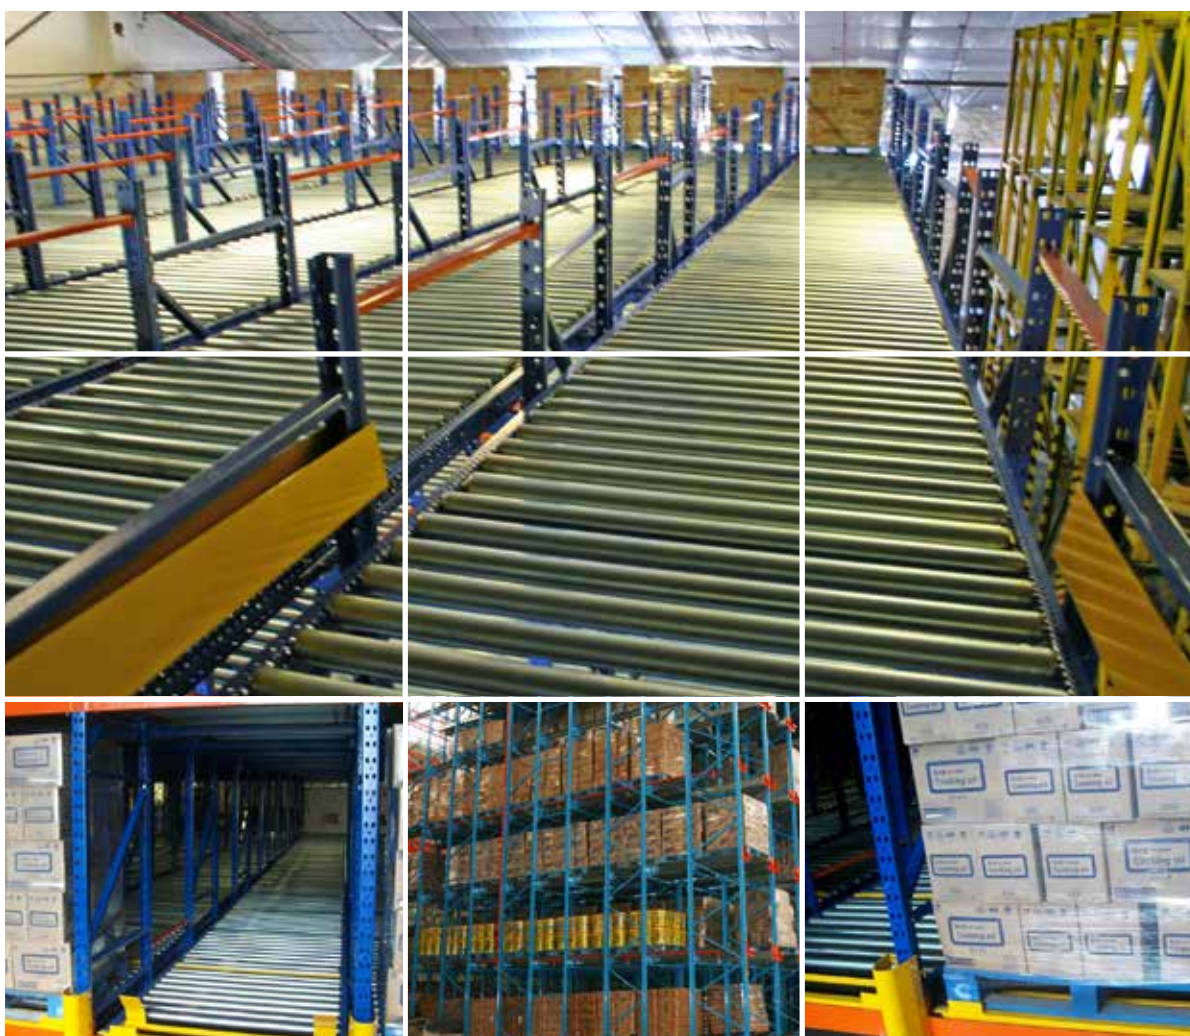

This system is designed for your specific storage applications.

PALLET FLOW STORAGE RACKING

Pallet Flow Racking

Pallet Flow Storage Systems, offer the benefits of high density storage, automatic stock rotation, fast efficient handling and simplified pallet selection. Pallets are stored on inclined tracks with rollers, which support and enable the pallet to roll from pallet deposit location to the picking face of the storage system. When a pallet is removed, the pallet immediately behind replaces its position, ensuring automatic stock rotation. Pallet Flow Racking is ideal for food and perishable items and eliminates the need for urgent pick face replenishments, providing a 'first in' 'first out' stock rotation. Bays can be made in lengths to suit various warehouse applications. This system is designed for your specific storage application.

CARTON FLOW STORAGE RACKING

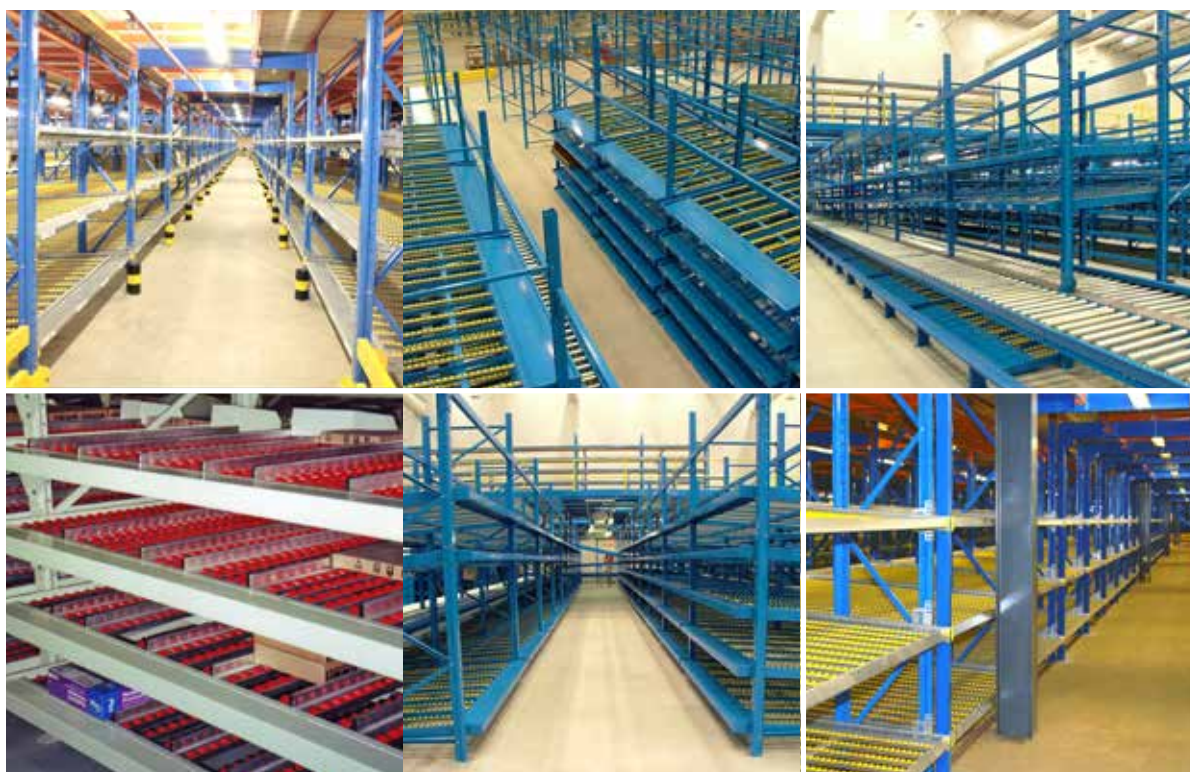

Pick Flow Systems / Carton Flow Storage

Carton Flow Storage can be incorporated into both Pallet Racking and Long-Span Shelving systems to maximise picking efficiencies, this offers many benefits over static shelving systems.

Efficient, fully adjustable, labour saving and versatile. Adjustable special connectors change the flowing frame. You can also adjust the space of the rollers and guides to make it suitable for a variety of goods. Cartons are stored on inclined tracks with rollers.

The system ensures automatic stock rotation and improves the productivity during picking. A series of gravity tracks transport suitably packaged products from replenishment aisles to picking faces providing stock rotation on a strictly 'first in' 'first out' principle and ensures continuous replenishment to the picking face. Carton Flow Storage is a unique storage and order picking system, designed to increase order-picking efficiency whilst saving on floor-space. Carton Flow Storage uses gravity to maximise the efficiency of full-and-split - carton order picking operations, designed for medium-high throughput split-case order picking.

This system is designed for your specific storage application.

LONG-SPAN STORAGE RACKING

The Long-Span Racking System has a large variety of Beams and Upright sizes and accessories can be configured for the storage of Car Tyres, Hardware, Rolls of Carpet, Drums/Barrels, Off-site or On-site Archiving, Long Loads, Large Boxes, Furniture, Beds & Mattresses, Coils and Reel storage systems.

Goods can be accessed by Mobile Steps or “Man Up” Reach Trucks which have specially designed platforms for the use in large bulk warehouse applications.

- A versatile cost effective storage system for 100% direct access to goods.
- Excellent storage space utilisation.
- Good for bulky hand packed items.
- Easy installation with bolted frames and fully adjustable support beams.
- A vast range of beam and frame sizes are available to suit your storage requirements.

Frames are manufactured in:

- Light Duty
- Standard Duty
- Medium Duty

PALLET MOLE™ RACKING

With the latest technology in compact, high density vertical storage, the Pallet Mole™ maximises the use of floor area and warehouse capacity.

Often production facilities need to store pallets of goods in the most compact way possible. The goal is usually to maximise the use of floor space; and in the case of cold pallet storage, the more compact the goods are stacked, the better the efficiency and ease of temperature control.

Pallet Mole™, enables “aisle free” pallet racking to provide a much higher density of storage than Adjustable Pallet racking, double deep storage and conventional VNA storage.

Powered by on-board rechargeable batteries, the Pallet Mole™ is driven on rails, into a specially designed pallet racking system of tunnels. Using the lifting platform and positioning sensors, each load is then transported to the furthest available storage location in the tunnel. Pallet storage and retrieval are both conveniently operated by the forklift truck driver using a remote control.

It is not necessary for a forklift to enter the racking system in order to retrieve a pallet.

A Pallet Mole™ rack structure is far more stable than traditional Drive-In systems. The mole system is supported at each level, whereas the Drive-In system is only supported across the top of the structure, making it extremely vulnerable to collapse should a single upright be damaged in any way.

Using a mole to retrieve a pallet completely eliminates the risk of a forklift driver damaging the racking while driving inside the system. No human can repeat the same movement over and over again without the possibility of a mistake. The mole removes ANY risk of mistakes inside the rack structure, therefore eliminating the possibility of any damage to pallets or racking while performing a deposit or retrieval movement.

The mole can move many more times faster and with 100% accuracy than any forklift driver, no matter what the driver's skill level.

The mole system can be uplifted and repositioned in any new warehouse, as well as be extended vertically, should the need arise.

The Pallet Mole™ counts the number of pallets in each lane for stock taking purposes, and shuffles pallets to the front of the rack removing whatever is being issued from any given lane. The mole is supplied with a charging station, and can “rest” in the station when not in use – only applicable to the fully automated system. The batteries are changed manually. The mole is easily transferred from one lane to the next, as easily as moving a pallet into or out of the rack. FIFO can be achieved with this rack proposal, as there is sufficient room for an aisle either end of the rack.

Pallet Mole™ – Standard Type – PM120-100

- Units designed to carry pallets:
1200 mm (W) x 1000 mm (D)
- Pallet Mole™ chassis width = 880 mm
- Pallet Mole™ depth = 1160 mm
- Pallet Mole™ height = 196 mm
- Lift height – Pallet = 50 mm
- Pallets with a maximum mass of 1500 kg
- Automatic Pallet Mole™, 1160 mm long by 880 mm wide fitted with 4 off, 100 mm diameter Nyl-o-tron wheels.
- Lift is provided by a suitably rated 3-phase electric motor operating via worm gears and eccentric cams.
- Long Travel is provided by a suitably rated 3-phase electric motor driving two wheels by means of chain drive.

Control Functions & Features:

- Single Deposit / Single Retrieve
- Auto Retrieve – When operating in this mode the Pallet Mole™ will immediately return and collect a second pallet and then wait in line for the first pallet to be removed by the Fork Lift Truck.
- Auto Deposit – When operating in this mode, a single instruction will enable the Pallet Mole™ to automatically and continuously Deposit pallets presented in the pick face for storage.
- Auto Retrieve by Quantity – When operating in this mode the Pallet Mole™ will Retrieve the number of pallets asked for in the beginning of the sequence.
- On/Off and Stop/Reset.
- Shuffle – This format allows the pallets to be moved in sequence to the offloading face in a FIFO and LIFO operation and where a number of pallets have been removed from the off-load face.
- Patented Pallet Count Function – This function will count the number of pallets in any lane and report the information to the hand-held controller. This feature greatly reduces the time normally associated with end-of-month stock-taking.
- Mole Removal – When operating in this mode the operator allows the Pallet Mole™ to be removed from the lane by moving all the way forward in the lane.
- Manual Operation – This function gives the operator the freedom to operate the Pallet Mole™ in manual when something is wrong or servicing needs to be performed.
- Teach Operation – This function allows the operator to teach the Pallet Mole™ when first used.
- “Battery Low Fail Safe” Function – The Pallet Mole™ monitors the battery charge level. On low level the Pallet Mole™ will execute the last command and return Home giving a “Charge” indication. The unit will not perform another operation until it has been charged.
- Each Pallet Mole™ is supplied complete with 1 of quick changeable “Lead-Acid Technology” battery pack and suitable charger. The battery pack is designed to operate within an AMBIENT environment for 8 Hours and in a FREEZER environment 4 Hours. (Additional stand-by batteries can be supplied to allow for 24 hr. operations). Alternatively, Lithium battery pack is also available as an optional extra, which will allow for an 8 Hour operation in a Freezer environment.
- The Pallet Mole™ requires no holes in rails to ensure operation. All positioning is done on-board of the unit. Each lane should however be provided with physical end stops to prevent accidental dislodging of the units.

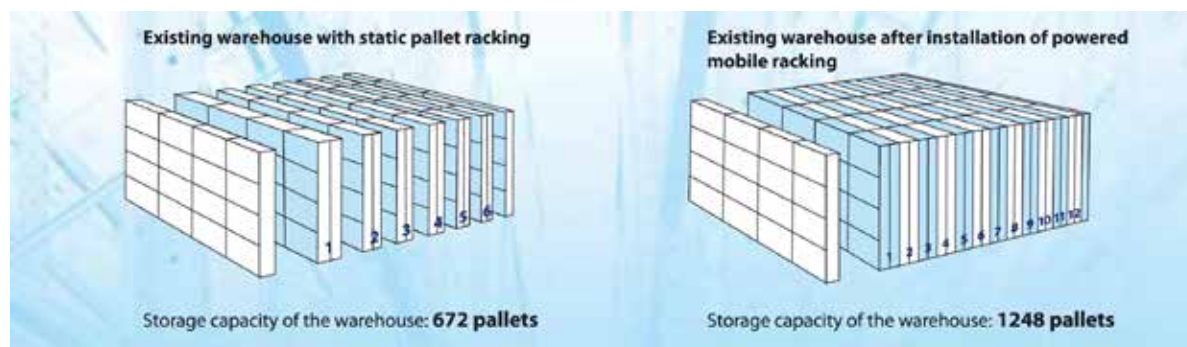

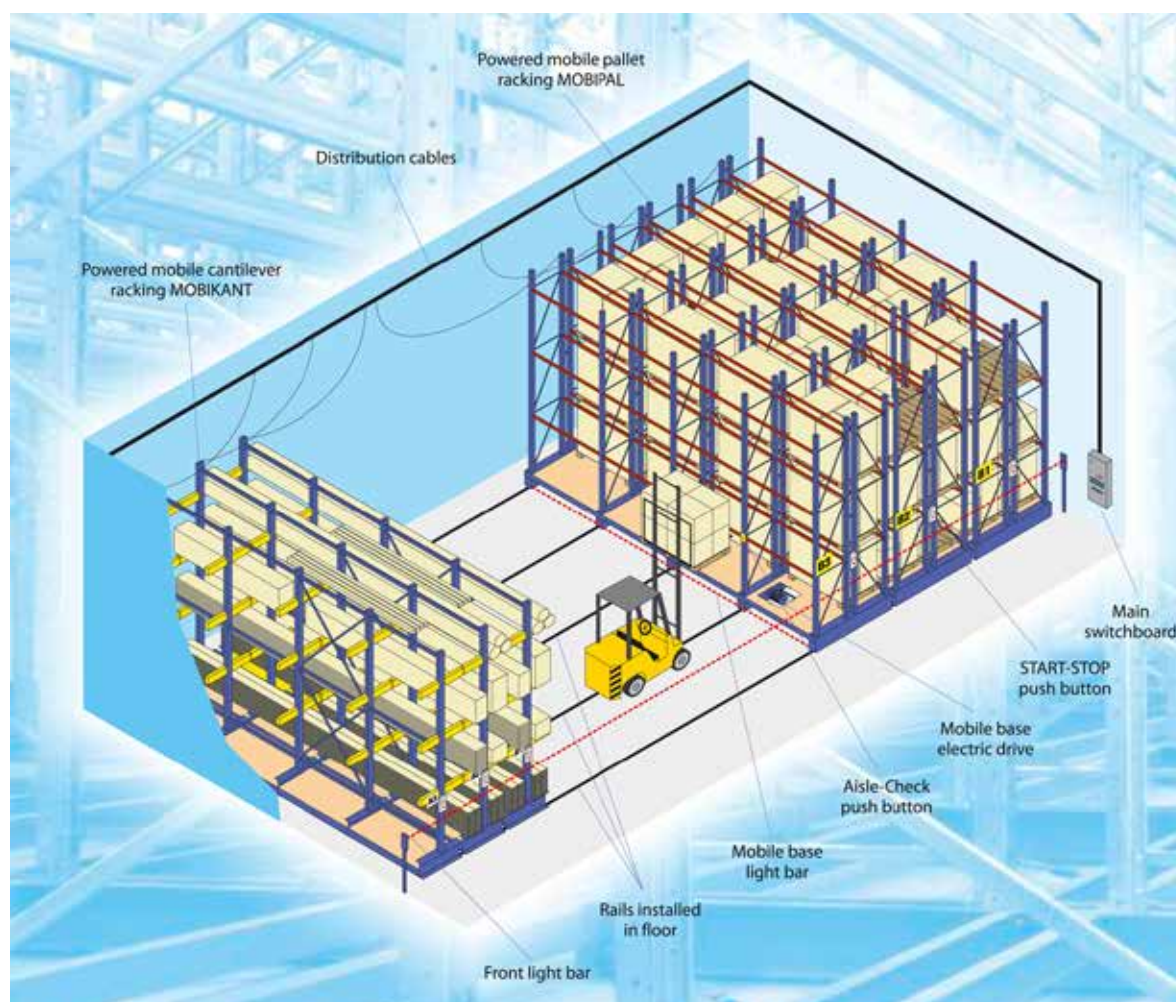

MOBILE STORAGE RACKING

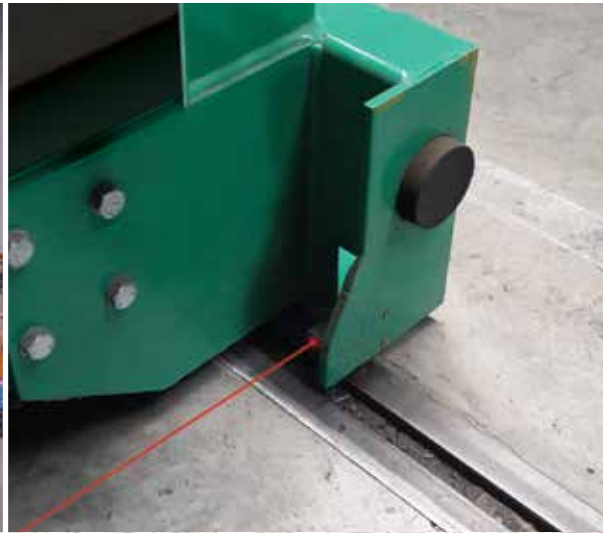

Mobile Storage Racking is suited for high density storage applications. This system allows access to goods which have many product lines, where stock rotation is critical in environments where space vs. economy.

This system is used when your storage requirement needs efficient high density storage, providing a 'first in' 'first out' principle. Mobile Racking consists of Storage Racking Superstructures mounted on electrically-driven bases, which move over sub-floor mounted railing systems. When a pallet is required, the appropriate selected aisle is opened with the use of a push button control.

Mobile Storage Racking is also ideal for space saving in lighting, heating or cooling, ventilation and materials handling costs. In freezer store applications, goods can be accessed by Reach Trucks fitted with heated cabs for operator comfort.

This system is designed for your specific storage application.

RACK SUPPORTED MEZZANINE FLOORS

Industrial rack supported mezzanine floors are a good economic alternative to a structural steel mezzanine floor support system, when it comes to the need for additional floor space in your warehouse or store. Advantages also include the use of the racking support frames in the inclusion of additional beams and decking, creating additional storage space above or below mezzanine level.

Staircases, handrailing, catwalks, pallet gates, wooden floor panels, steel floor panels, goods chutes, offices and conveyors can also be included in the construction of these rack supported mezzanine systems.

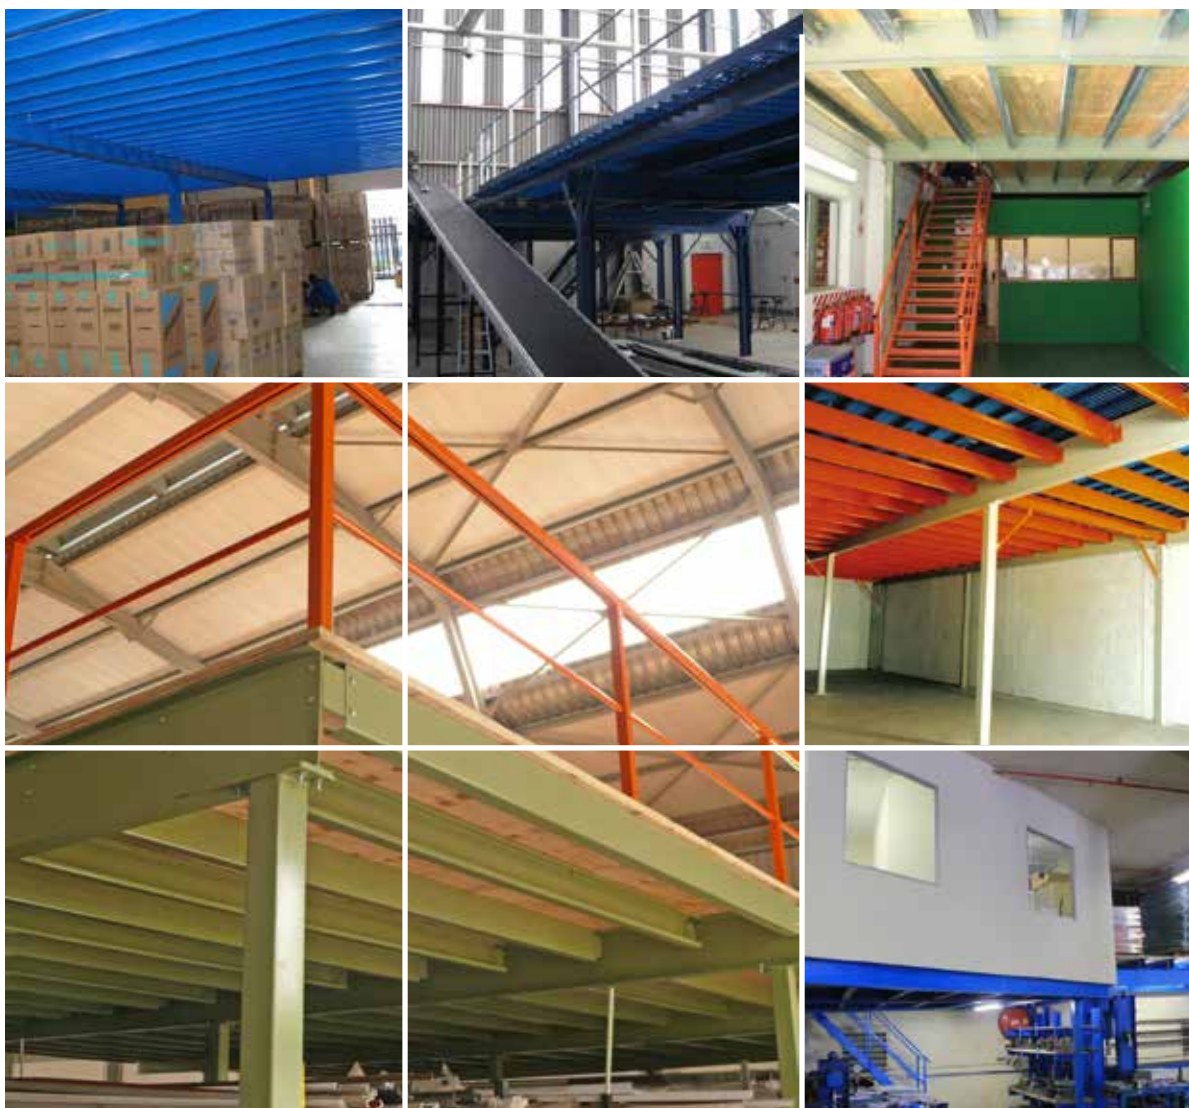

STRUCTURAL MEZZANINE FLOORS

Additional space for:

- New Offices
- Working areas
- Night Parking
- Storage Space / Packing Space

Speak to us for a custom quote to design/manufacture and install structural steel mezzanine flooring at your office, warehouse or distribution centre.

We also offer Industrial rack supported mezzanine floors which are a good economic alternative to a structural steel mezzanine floor support system, when it comes to the need for additional floor space in your warehouse or store. Advantages also include the use of the racking support frames in the inclusion of additional beams and decking, creating additional storage space above or below mezzanine level.

HIGH DENSITY FILING SYSTEMS

Mr Shelf has products that save space and time in the workplace by focusing on quick and easy accessibility of information. A local design coupled with innovation and superior quality software resulting in an information storage system that is attractive, effective and economical.

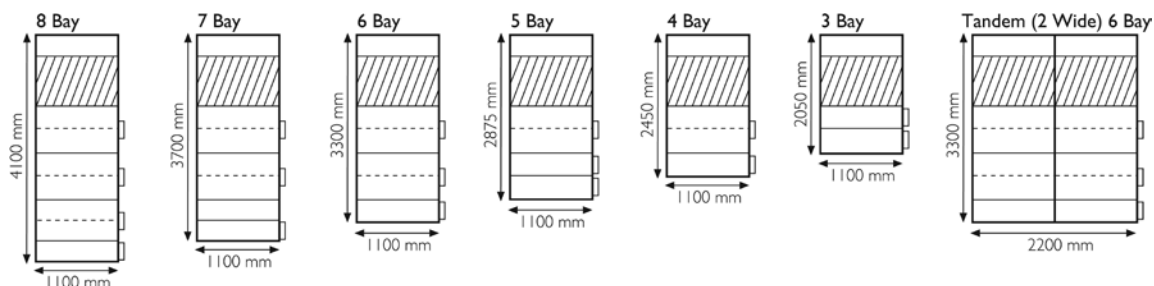

Features

- Allows the user to make use of vertical height – costly floor space is minimised.
- Allows the user a myriad of internal component combinations dependant on the storage application.
- Inside of the cabinet can be simply adjusted at any time making use of multiple setting options on the side of the cabinet.
- A variety of finish options are available to enhance the overall aesthetic of the area in which the cabinets are being installed.

Full Height Lockable Doors

The Full Height Lockable Doors which is available as an option can be used either on a free-standing unit or on the single bay at the end of a Hi-Density Filing System.

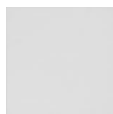

NOTE:

- Sizes above – calculated using 400mm deep units.
- 360mm units are also available but cannot be used with pull-out components.
- Single and Tandem bays (1, 2, 3, 4 etc. wide) are available in multiple combinations.
- This storage system will add to improved working efficiency and saving floor space.

Finishes:

Metal

(Std and Incl. in the prices)

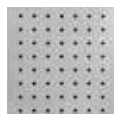

Folkstone Grey

Storm Grey

Decorative cladding - Metal

(Optional extra)

Perforated

Dimple

Decorative Cladding - Laminate

(Optional extra)

Burgundy Mahogany

Bodensee Cherry

Folkstone Grey

Vancouver Maple

Bavarian Beech

Natural Oak

Handles:

Black handle

Silver handle

Chain Drive
(Optional extra)

The Chain Drive is recommended in the instance where the bays are being used in tandem i.e. 2 wide, 3 wide etc., or in the instance where a large multiple of bays are being used.

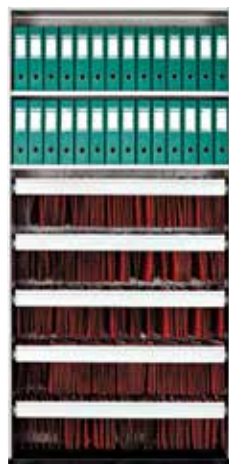

Bay accommodates:
A4 suspended pockets

Using 5 x universal pull out cradles

- Each cradle accommodates 1.0 L/meters of files
- 5.0 L/meters of files per bay
- We recommend NOT going higher than 5 x cradles per bay

And 2 x /Shelves

- Accommodates either Lever Arch files or archive boxes

Bay accommodates:
Foolscap suspended pockets

Using 5 x universal pull out cradles

- Each cradle accommodates 1.0 L/meters of files
- 5.0 L/meters of files per bay
- We recommend NOT going higher than 5 x cradles per bay

And 2 x /Shelves

- Accommodates either Lever Arch files or archive boxes

Bay accommodates:
Lever Arch Files

Option 1:

- Using 5 x shelves/ 6 openings
- i.e. NO shelf wire racks
- Each shelf accommodates 14 x A4 Lever Arch Files
- 84 Lever Arch Files per bay.

Option 2:* Using 5 x shelves/6 openings and 6 x shelf wire racks

- Each shelf accommodates 12 x A4 Lever Arch Files
- 72 Lever Arch Files per bay

Bay accommodates:
A4 containers (pull out drawers)

Using 5 x universal pull out drawers

- Each drawer accommodates 9 x A4 containers
- 45 x A4 containers per bay
- We recommend NOT going higher than 5 x drawers per bay

And 2 x shelves

- Accommodates either Lever Arch Files or archive boxes

Bay accommodates:
A4 containers (shelves)

Using 7 x shelves/ 8 openings

- Each shelf accommodates 10 x A4 containers
- 80 x A4 containers per bay
- We recommend using Hold-It Labels on the sides of the containers

Bay accommodates:
Lateral shelf files

Using 7 x shelves/ 8 openings and 8 x shelf wire racks

- Each shelf 1.08 L/ meters of files
- 8.64 L/meters of files per bay

Bay accommodates:
Archive boxes

Using 6 x shelves/ 7 openings

- Each shelf accommodates 9 x standard archive boxes
- 63 x standard archive boxes per bay OR
- Each shelf accommodates 5 x jumbo archive boxes
- 35 x jumbo archive boxes per bay

Bay accommodates:
Off-site storage boxes

Option 1:

Using 6 x shelves/ 7 openings (with A4 size contents in box)

- Each shelf accommodates 2 x off-site storage boxes
- 14 x off-site storage boxes per bay

Option 2:

Using 5 x shelves/ 6 openings (with Lever Arch Files in box)

- Each shelf accommodates 2 x off-site storage boxes
- 12 x off-site storage boxes per bay

Additional components

Pull-out working shelf

- Used when referencing documents within the filing bay
- Should be positioned immediately below a shelf
- Use only one pull-out working shelf per two filing bays

Pull-out stationery drawer

- Used for the storage of stationary, CD's etc.
- Must be fitted directly below a shelf
- Fitted with a lock as a standard feature

A4 Pull-Out Drawer

- Accommodates 9 A4 containers.
- Recommended no more than 5 Pull-Out Drawers and 2 shelves are fitted per single bay.
- Accommodates 0.95 linear meters of A4 filing.

Shelf Wire Rack

Lockabe shelf door

- Is an independently lockable cabinet within a bay
- Used as a security cabinet

A4 Pull-Out Cradle

- Accommodates A4 suspended pockets (hanging files).
- TWO filing options include:
 - Suspend the A4 files in 3 equal rows from front to back.
 - Suspend the A4 files from left to right.
- Recommended no more than 5 A4 Pull-Out Cradles and 2 shelves are fitted per single bay.

Pull-out plan filing cradle

- Used mainly for A0 plans
- Has 5 x binders per cradle
- Each binder holds 30 to 40 plans

Step stool with collapsible wheel

Allows the user easier access to the top shelves.

TOP RETRIEVAL FILING SYSTEMS

Mr Shelf has products that save space and time in the workplace by focusing on quick and easy accessibility of information. A local design coupled with innovation and superior quality software resulting in an information storage system that is attractive, effective and economical.

Features

- All cabinets are fitted with a precision engineered steel internal frame.
- All cabinets are fitted with 103% extension, 3 part roller bearing drawer runners.
- The drawer runners have a load bearing capacity of 90kg per pair.
- All cabinets are fitted with anti-tilt mechanisms – can only open 1 drawer at a time.
- All cabinets have a central locking mechanism.
- All cabinets have adjustable ferrules to cater for uneven floors.
- Each drawer holds 15 A4 containers.
- Each drawer has up to 1.5 linear meters of filing.
- Base plates and utility drawers are available.

Cabinets to house suspended pockets, CD's, cheque books, X-rays, Lever Arch files etc., are available on special request. Top Retrieval Cabinets have a 10 year guarantee.

Drawer Runners
Anti-Tilt (Lock Rod)

Drawer Runners
Anti-Tilt (Runner)

Drawer Runners
90kgs, 103% Extension, Anti-Tilt

Complete Metal Frame
Including Top, Bottom and Uprights

Finishes:

Laminate

Burgundy Mahogany **Bodensee Cherry** **Folkstone Grey** **Bavarian Beech** **Natural Oak** **Vancouver Maple**

NOTE: PLEASE be advised that alternative cladding options are available on request HOWEVER must be quoted accordingly.

Veneer

Oak **Cherry** **Maple** **Beech** **Mahogany**

PLEASE NOTE: (E & OE)

- Due to the printing process, true colours may vary from what is shown in the catalogue
- Details correct at the time of going to print

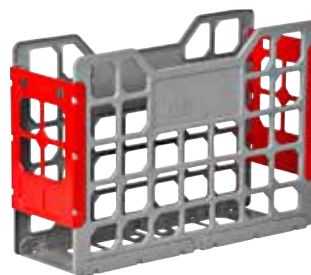

Handle types

Used on laminate cabinets

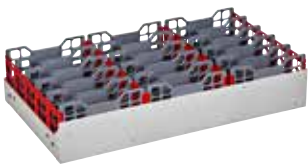

- Silver oval arch
- Black oval arch
- Black PVC
- Brown PVC

Internal components

- **Cradle for suspended pockets**
- **Utility drawer**
 - Available for the mini and standard size.
 - Used to elevate the sides and back of the drawer to the same height as the front of the drawer.
 - Does not include the base plates required to close the bottom of the drawer.
- **Metal base plate**
 - Used to close the bottom of the drawer.
- **Record ring**
 - Used in instances when the client elects not to make use of containers within the cabinet, and uses the record ring to hold the files in an upright position.
 - Accommodates the files from front to back in the cabinet.
 - In most instances to be used in conjunction with a metal base plate.
- **Vacuum formed pen and pencil tray**
 - Generally used in a shallow drawer to accommodate pens, pencils, paper clips etc.

16mm square top
(standard)

32mm square top
(optional)

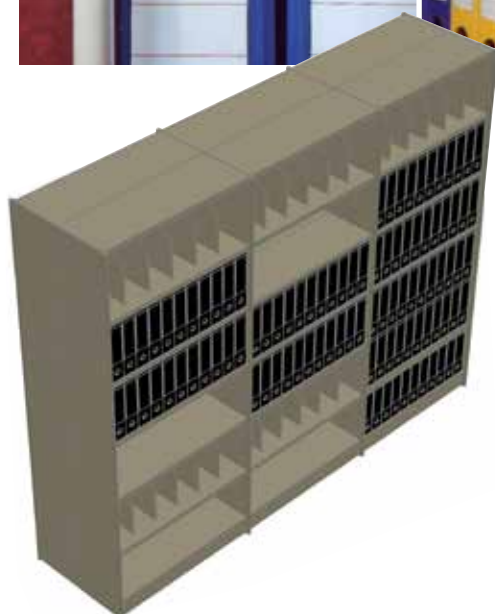

Cradle for suspended pockets

RUT ADJUSTABLE SHELVING

This slim functional upright profile makes it the ideal choice wherever books, files and records of any type are stored. With accessories such as file rails, dividers or bin fronts it can be easily adapted to the wide ranging needs of offices, hospitals, banks and other commercial institutions.

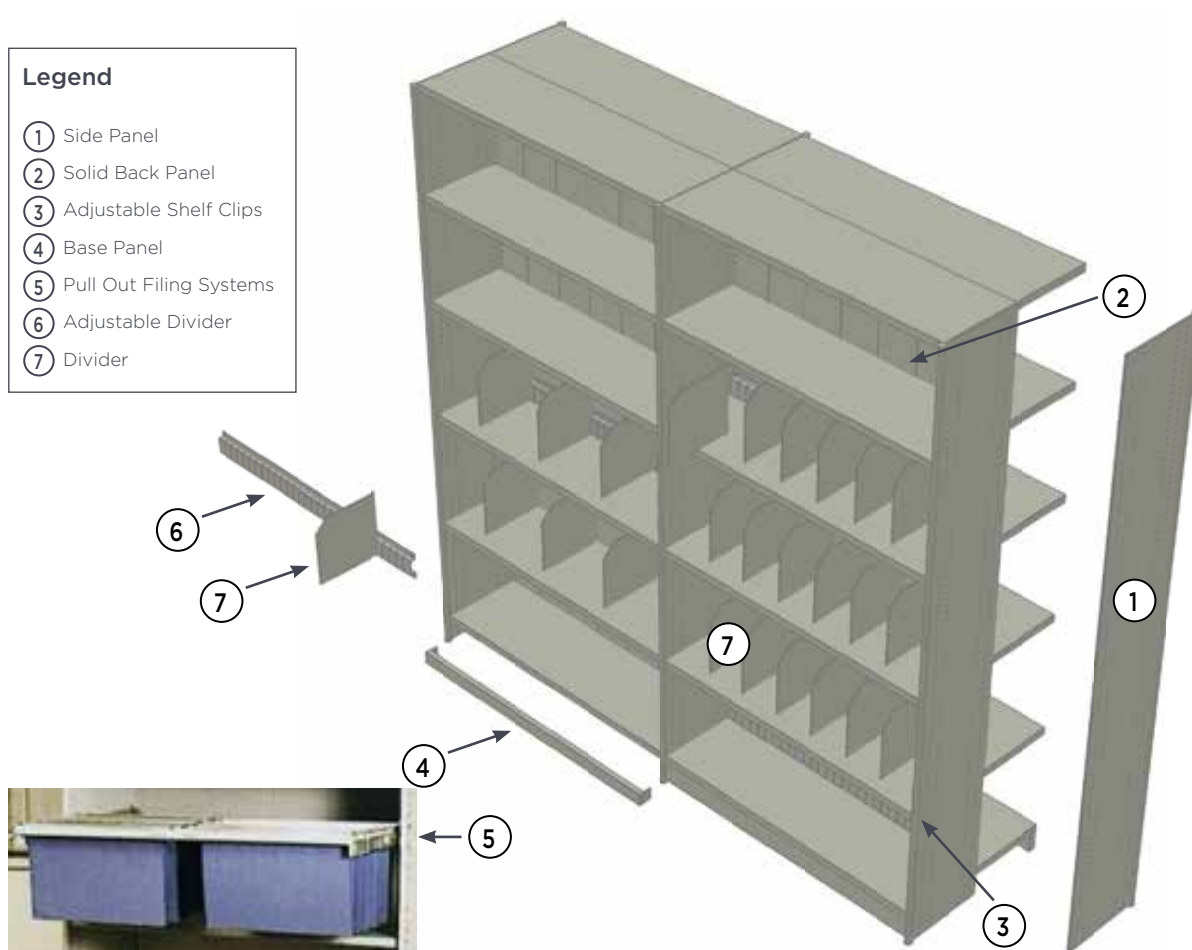

At the heart of the system is the slim rolled profile of the front upright of the shelving bay. It gives strength and stability to the rack whilst allowing easy uninhibited access to the items stored on the shelf. Adjustable holes are positioned at 25mm intervals in the height of the frame so that shelves can be precisely positioned to maximise the use of available space.

Backs of racks can be open for economy or solid clad where small items are stored.

STEEL FILING CABINETS

Features

- Aluminium handles incorporating an ID strip for superior durability and identification,
- Aluminium locking mechanism with an “Anti-tilt feature” for added safety and security.
- Drawers with 35kg Rated ballbearing slides have rails to hold foolscap hanging files.
- Made in 2, 3 and 4 drawer models.

2-Drawer

Code:	PRFC2DR
Height:	725 mm
Width:	465 mm
Depth:	625 mm

4-Drawer

Code:	PRFC4DR
Height:	1295 mm
Width:	465 mm
Depth:	625 mm

3-Drawer

Code:	PRFC3DR
Height:	1010 mm
Width:	465 mm
Depth:	625 mm

STEEL STATIONERY CABINETS

Stationery Cabinets

Features

- Durable Epoxy Powder Coated finish.
- Raised base/plinth for stability and ease of cleaning.
- One year Warranty against defective workmanship.

2-Shelf

Code:	PRSC2S
Height:	900 mm
Width:	910 mm
Depth:	450 mm

4-Shelf

Features

- Reinforced doors for strength and quietness.
- Chrome door handle with a 3 point locking mechanism for added security.
- Reinforced shelves adjustable @ 50 mm increments.

Code:	PRSC4S
Height:	1800 mm
Width:	910 mm
Depth:	450 mm

FILING SOFTWARE

Mr Shelf has products that save space and time in the workplace by focusing on quick and easy accessibility of information. A local design coupled with innovation and superior quality software resulting in an information storage system that is attractive, effective and economical.

Features

- An effective filing (cradle to grave) system.
- An effective filing system that caters for active, semi-active, archival and off-site information storage applications.
- All products are manufactured from superior file quality materials.

Files

- 120gm
- 10mm gusset
- 50 sheets of paper

Labels

- Adhesive labels
- Premise of entire system
- Colour coded for easy tracking
- Affixed to pre-printed scale on the top of each file
- Ensures every label is correctly placed and aligned
- Speeds access to file
- Helps to eradicate misfiling

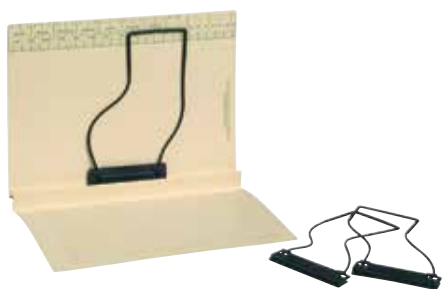

55mm alphabetical adhesive labels

- Available in 14 different colours – single pack
- 24 labels per sheet – 6 sheets per pack – 144 labels per pack
- Mixed pack also available – 1 sheet per colour – 336 labels per pack
- Formatted on A4 size paper for easy use in most printers
- Free software label programme – download www.specfiling.co.za

30mm numerical adhesive labels

- Available in 14 different colours – single pack
- 40 labels per sheet – 5 sheets per pack – 200 labels per pack
- Mixed pack also available – 1 sheet per colour – 560 labels per pack
- Formatted on A4 size paper for easy use in most printers
- Free software label programme – download www.specfiling.co.za

Clips/Dividers

Econo plastic clip – with adhesive tape

- Used within file to secure documents
- Double sided affixing tape included

A4 divider card/file out card

- 190gm custodian file quality board
- Pre-printed with all the scales as per the files
- Used to sub-divide the contents within the filing system
- Also used as a file out card

A4 file divider

- 90gm custodian file quality board
- Pre-printed with all the scales as per the files
- Used to sub-divide the contents within the file

Archive boxes

Foolscap legal box

- 97mm x 75mm x 377mm

A4 standard archive box

- 255mm x 115mm x 330mm

A4 jumbo archive box

- 255mm x 210mm x 330mm

Foolscap archive box

- 255mm x 115mm x 365mm

Foolscap jumbo archive box

- 255mm x 210mm x 365mm

Off-site storage box

Lateral archive backing board with clip

Off-site storage box

- 255mm x 330mm x 433mm

Master Box

A4 master box

- Pre-printed with all the scales as per the files
- Used to sub-divide the contents within the A4 container
- Used to accommodate periodicals/magazines/brochures/letterheads etc.
- 3 x master boxes fit into one A4 container

A4 container contents into archive box

2 x A4 container contents into jumbo archive box

Lever arch contents onto archive backing board

Archive backing boards into off-site storage

Archive backing boards into off-site storage

A4 containers into off-site storage

Lever arch files into off-site storage

Board containers

A5 board container

- 235mm length x 156mm height x 85mm width
- Manufactured from acid free e-flute board
- Used to accommodate A5 files
- Used to hold the files upright in the cabinet

A4 board container

- 320mm length x 220mm height x 100mm width
- Manufactured from acid free e-flute board
- Used to accommodate A4 files
- Used to hold the files upright in the cabinet

Government size board container

- 350mm length x 220mm height x 100mm width
- Manufactured from acid free e-flute board
- Used to accommodate government size files
- Used to hold the files upright in the cabinet

Foolscap board container

- 370mm length x 220mm height x 100mm width
- Manufactured from acid free e-flute board
- Used to accommodate foolscap/folio files
- Used to hold the files upright in the cabinet

Plastic containers

A4 plastic container

- 320mm length x 220mm height x 100mm width
- Manufactured from ABS plastic – No waste and 100% recyclable
- Used to accommodate A4 files
- Used in and out of the cabinet

Solid A4 plastic container

- 320mm length x 220mm height x 100mm width
- Manufactured from ABS plastic – No waste and 100% recyclable
- Used to accommodate A4 files
- Used in and out of the cabinet

STEEL LOCKERS

Manufactured with varying door sizes to suit your requirements.

Features

- Louvered doors for ventilation
- Padlock system on doors
- Lockers can be combined with a Meranti Slatted Bench

Code	Description	Dimensions	
DTSLOCK1DOOR	Single locker 1 door	1800 height x 300 width x 450 depth	Top Shelf and Hanging Rail

PLASTIC LOCKERS

Rotationally Moulded Poly Lockers

Robust, ultra hygienic and a solution to forever rusting and unsightly metal and wire cage lockers.

- All lockers can be riveted side by side in batches for added stability
- Easy to clean – Simply clean with soap and water
- Easy to maintain – No need to paint or rust proof, making them low maintenance
- Durable – Double wall constructed lockers are dent and corrosion resistant
- Quiet – No loud banging

2, 3, 4 and 6 Tier Full Locker

Sold as a full locker unit consisting of 2, 3, 4 and 6 Locker compartments. Free-standing with adjustable feet. The slanted-top format, to be used in the top row of lockers, with no flat surface where dust can gather.

Description	Dimensions
2 Tier, 3 Tier, 4 Tier, 6 Tier (Slant)	310 x 380 x 1940 mm

MOBILE SAFETY LADDERS

Our range of Mobile Ladders are Electro Galvanised or Epoxy Powder Coated for extra durability for any warehouse or storage conditions.

Designed for safe access to higher storage levels of Racking and Shelving systems. Mobile Safety Steps are fitted with Handrails and include "Kick-Lock" Castor wheels for extra safety and stability.

Mobile Ladders are available in the following sizes:

Mobile Safety Ladder	Code	Platform High
<ul style="list-style-type: none"> • Ideal for stock picking • Used commonly between racking & shelving • Non-slip steps • Full safety handrailing • Lockable castors • Tread width 600mm • Total base width 950mm 	MLH 2 Step (no handrail)	450 mm
	MLH 3 Step	710 mm
	MLH 4 Step	960 mm
	MLH 6 Step	1440 mm
	MLH 8 Step	1930 mm
	MLH 10 Step	2410 mm
	MLH 12 Step	2890 mm
	MLH 15 Step	3680 mm

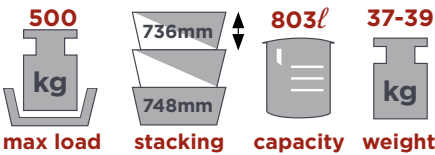

JUMBO BINS

Mr Shelf products fall into the following categories i.e. Jumbo Bins, Environmental Refuse Bins, Storage Bins, Secure Plastic Containers and Storage Crates & Containers.

Each category offers practical, durable systems that are designed to function efficiently under the challenging conditions found within the Southern African retail, industrial, agricultural and environmental markets.

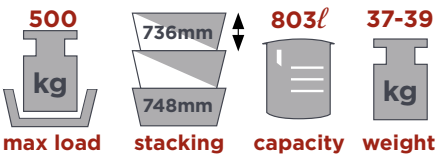

Features

Our Jumbo Bin is a reliable, sustainable and profitable plastic alternative to the wooden bin traditionally used in the agricultural industry. It is considered by many to be one of the best quality bulk bins in the world. Rounded corners and smoother interior surfaces result in less bruising and damage to fresh produce. Vents provide superior air flow, adding valuable shelf-life to fresh produce. Smooth, nonabsorbent surface is not affected by dipping operations. The design is compatible with most bin handling equipment. Unique moulded label holders for cards and tags. Easy, clear ownership identification with hot foil stamping. Comfortable hand holds are built for easy lifting and handling of bins. The positive interlocking foot design permits fast and safe stacking. Ventilation slots: 804 air vents with 8 mm or 3 mm vent opening. 4700 kg on level ground in cold storage. 3800 kg on level ground in temperatures less than 35° C, for less than one month. 3400 kg on level ground at temperatures less than 35° C, for more than one month.

Code:	JB1000 Vented
Material:	Polypropylene
Ext. Top:	1276 x 1076 x 748 mm (H)
Int. Base:	1196 x 996 x 617 mm (H)
Carrying Load:	500 kg
Stack Height:	736 mm

REFUSE BINS

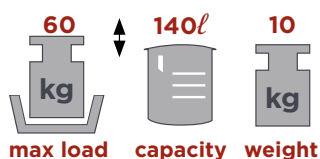

Mr Shelf products fall into the following categories i.e. Jumbo Bins, Environmental Refuse Bins, Storage Bins, Secure Plastic Containers and Storage Crates & Containers.

Each category offers practical, durable systems that are designed to function efficiently under the challenging conditions found within the Southern African retail, industrial, agricultural and environmental markets.

Using a multi-focus team approach, the sales, marketing and manufacturing departments are fully integrated and trained to find solutions that meet the customer's needs and expectations.

Features

- The 140-litre bin is designed for industrial and household use.
- The bin features a specially designed rim flange for operational reliability, and is highly resistant to the effects of continuous mechanical handling.
- The design is shock-absorbent, resistant to chemical attack and will withstand the extreme and frequent temperature variations experienced in South Africa.
- The rubber wheels minimise noise pollution and provide easy manoeuvrability.
- The bins can be manufactured with lids that are suitable for selective collection. In addition, the 140-litre wheeled bin can be personalised with company graphics and microchip identification.

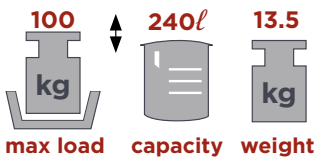

Code:	CT8108
Material:	HDPE
Ext. Top:	482 x 587 x 1057 mm (H)
Int. Base:	N/A
Wheels:	200 mm
Max Load:	60 kg
Stack Height:	N/A
Nest Height:	130 mm
Colour:	

140 Litre 2-Wheeled Bin

Features

- The 240-litre bin is designed for industrial, household and hospitality use.
- The bin features a specially designed rim flange for operational reliability, and is highly resistant to the effects of continuous mechanical handling.
- The design is shock-absorbent, resistant to chemical attack and will withstand the extreme and frequent temperature variations experienced in South Africa.
- The rubber wheels minimise noise pollution and provide easy manoeuvrability.
- The bins can be manufactured with lids that are suitable for selective collection. In addition, the 240-litre wheeled bin can be personalised with company graphics and microchip identification.

Nest Height:	145 - 160 mm
Colour:	

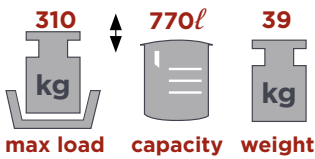

240 Litre 2-Wheeled Bin

Designed for selective bulk waste recycling

Features

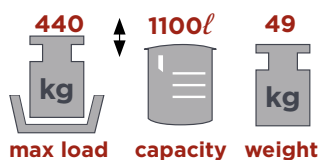

- This 4-wheeled range comes in two sizes; with lids, and can be used for the collection of specific types of waste.
- Rounded corners and an optimally positioned drain plug provide an easy-clean solution.
- This design features an ergonomic handgrip and additional handles on all three sides to facilitate access and motion.
- The bin is also shock absorbent and resistant to chemical products and extreme temperature.
- The rubber wheels minimise noise pollution and provide easy manoeuvrability.

SECURE PLASTIC CONTAINERS

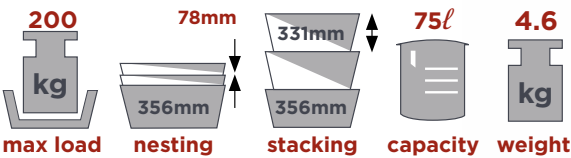

Mr Shelf products fall into the following categories i.e. Jumbo Bins, Environmental Refuse Bins, Storage Bins, Secure Plastic Containers and Storage Crates & Containers.

Each category offers practical, durable systems that are designed to function efficiently under the challenging conditions found within the Southern African retail, industrial, agricultural and environmental markets.

Using a multi-focus team approach, the sales, marketing and manufacturing departments are fully integrated and trained to find solutions that meet the customer’s needs and expectations.

Features

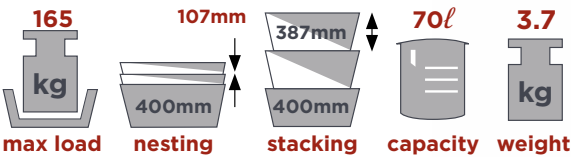

- 5 available sizes form an integrated system.
- Capacities from 6.4 litres up to 75 litres.
- Stackable, nestable and compatible with pallets and dollies.
- Secure enough for heavy duty transit.
- Flat base makes them conveyor friendly.
- The containers are designed to use tamperproof seals and locks.
- Hinged lids.

- Tough, durable and impact/acid resistant
- Made from polypropylene co-polymers
- Bins are stackable & dividers are available for each size
- 7 sizes available

STORAGE CRATES AND CONTAINERS

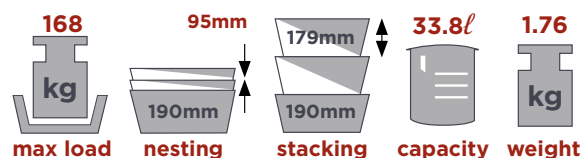

Mr Shelf products fall into the following categories i.e. Jumbo Bins, Environmental Refuse Bins, Storage Bins, Secure Plastic Containers and Storage Crates & Containers.

Each category offers practical, durable systems that are designed to function efficiently under the challenging conditions found within the Southern African retail, industrial, agricultural and environmental markets.

Using a multi-focus team approach, the sales, marketing and manufacturing departments are fully integrated and trained to find solutions that meet the customer's needs and expectations.

Features

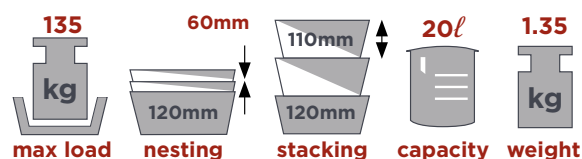

- A selection of storage crates with different capacity designed to protect product.
- Improved ventilation.
- No assembly means increased efficiency.
- Return nesting reduces transport costs.
- Reduces packaging waste.

Code:	SN 64190

Haverhill and Lid

Meat Trays

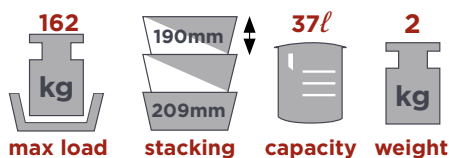

- Useful for meat, baked goods, poultry or agricultural produce.
- Excellent stacking features optimise floor space and contribute to a safer and tidier working environment.
- Solid base and sides.
- Made from virgin food-grade material.
- Easy to clean and hygienic.
- HACCP compliant.
- Optimises pallet use and storage space.
- Reduces product damage in transport.
- Impact resistant.
- Suitable for use on roller conveyer systems and flow racks.
- Compatible with European size pallets.

Code:	C141
Material:	Polypropylene
Ext. Top:	495 x 350 x 178 mm (H)

60 Litre Meat Box

Features

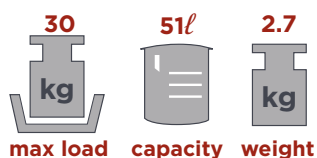

- These Stack Mould crates are compatible with existing KLTs and R-KLTs in the market.
- Durable as are designed specifically for the automotive industry and related heavy industries. The ribs on the side walls give it added strength.
- Smooth base so is compatible with conveyor systems.
- Designed to be compatible with automatic lifting.
- Handles for manual lifting and handling
- Lid available.
- Does not have cross stacking features.
- Two R-KLT4329s stack onto a single R-KLT6429
- Can be printed and RFID compatible (within the handle)
- Single walled
- Smooth base
- No drainage holes
- Location for Kanban Holders (spring clip held)

Code:	R-KLT4329: 400
Material:	Polypropylene
Ext. Top:	400 x 300 x 280mm (H)

33 Litre Freezer Tray

Please note that black containers are manufactured from recycled raw material. Please consider this in your application. We will not be held accountable for breakages, or guarantee black recycled products.

HAND TROLLEYS

Mr Shelf products only use the finest components that are available and ensure that they have all been tested under the strictest conditions.

All our swivel housing and wheels are manufactured to the highest specifications and are regularly tested to the ISO and the SABS standards.

The electro galvanising is applied using ISO and SABS standards.

Customer Car Trolley

Dimensions	830mm long, 585mm wide, 960mm high
Wheels	Front and Back: 100mm
Capacity	Approx. 300kgs

Folding Nose Trolley

Dimensions	Available in 3 sizes:
	Small: 1150mm high, 420mm wide, 535mm length
	Medium: 1150mm high, 520mm wide, 520mm length
	Large: 1150mm high, 610mm wide, 590mm length
Wheels	200mm solid rubber wheels
Capacity	Approx. 250kgs
Finish	Electroplated

Crate Trolley

Dimensions	1240mm high, 470mm wide (incl. wheels), 230mm long
Wheels	Large 200mm solid rubber wheels
Capacity	Approx. 250kgs. Can carry 5 mineral cases
Finish	Electroplated / Powder coated

Sack Trolley

Function	Ideal for moving sacks and round barrels
Dimensions	1060mm high, 550mm wide (incl. wheels), 460mm long
Wheels	200mm solid rubber wheels
Capacity	Approx. 250kgs
Finish	Electroplated

SUB 10 Beer Crate Trolley

Function	Ideal for 10 cases or heavy loads
Dimensions	1350mm high, 540mm wide
Wheels	200mm solid rubber wheels
Capacity	Approx. 250kgs
Finish	Galvanised

Single Cylinder Trolley

Function	Ideal for moving single gas bottles. Strong & robust design
Dimensions	1110mm high, 300mm wide
Wheels	200mm solid rubber wheels
Capacity	Approx. 200kgs
Finish	Galvanised

Double Cylinder Trolley

Function	Ideal for moving 2 gas bottles
Dimensions	1110mm high, 550mm wide
Wheels	200mm solid rubber wheels
Capacity	Approx. 220kgs
Finish	Galvanised

PLATFORM TROLLEYS

Mr Shelf products only use the finest components that are available and ensure that they have all been tested under the strictest conditions.

All our swivel housing and wheels are manufactured to the highest specifications and are regularly tested to the ISO and the SABS standards.

The electro galvanising is applied using ISO and SABS standards.

Pallet Jack Trolley

Wheels	Available with single or double bogey wheels
Capacity	2500kgs

Tuff Truck Trolley

Dimensions	900mm long, 600mm wide, 900mm high
Wheels	Front and Back: Heavy duty 125mm
Capacity	Up to 700kgs

Small Platform Trolley

Dimensions	900mm long, 600mm wide, 900mm high
Wheels	Front and Back: 100mm
Capacity	Approx. 300kgs

Large Platform Trolley

Dimensions	1200mm long, 680mm wide, 900mm high
Wheels	Front and Back: 125mm
Capacity	Approx. 300kgs

Mammoth Trolley

Dimensions	1498mm long, 596mm wide, 960mm high
Handles	Both sides
Wheels	2 x 200mm, 4 x H/D 125mm
Capacity	Approx. 1000kgs
Finish	Electroplated

Mammoth Merchandiser

Dimensions	1498mm long (incl. basket), 596mm wide, 960mm high
Basket	Large wire basket
Handles	Double handle, 1 side for paper & cardboard boxes
Wheels	2 x 200mm, 4 x H/D 125mm
Capacity	Approx. 1000kgs
Finish	Electroplated

Mammoth Mesh Trolley

Dimensions	1498mm long, 596mm wide, 960mm high
Handles	Both sides
Wheels	Front and Back: Heavy duty 125mm
Capacity	Approx. 1000kgs

Special sizes manufactured to order.

Utility Trolley

Dimensions	900mm long, 600mm wide, 900 high
Wheels	Front and Back: Swivel castors 125mm
Handles	Both sides

This trolley is stackable and also available with a lockable lid.

MERCHANDISING & DISPLAY TROLLEYS

Mr Shelf products only use the finest components that are available and ensure that they have all been tested under the strictest conditions.

All our swivel housing and wheels are manufactured to the highest specifications and are regularly tested to the ISO and the SABS standards.

The electro galvanising is applied using ISO and SABS standards.

Standard Merchandising Trolley

Dimensions	920mm long, 880mm high 460mm wide (front), 490mm wide (back)
Wheels	Front and Back: 125mm
Basket	Small wire basket
Capacity	Can nest and load approx. 250kgs

DIY Merchandising Trolley

Dimensions	920mm long, 880mm high 460mm wide (front), 490mm wide (back)
Wheels	Front and Back: 125mm
Basket	Flip-over, fold-away, wire mesh basket
Capacity	Can nest and load approx. 250kgs

Nursery Trolley

Dimensions	920mm long, 460mm high, 500mm wide
Wheels	Front and Back: 125mm
Basket	Flip-over wire basket
Capacity	Can nest and load approx. 250kgs
Finish	Electroplated

Heavy Duty Nesting Trolley

Function	Ideal for the larger store, especially the cash & carry type
Dimensions	1250mm long (incl. handle and basket), 1100mm high 585mm wide (back), 560mm wide (front)
Wheels	Front and Back: 160mm
Basket	Flip-over wire basket
Capacity	700kgs

Halstead Bread Trolley

Function	Ideal for bread rolls
Wheels	Front and Back: 75mm
Capacity	Between 4 & 5 wicker baskets
Finish	Galvanised
Feature	Angle of slope can be adjusted

Five Tier Bread Display Trolley

Function	Ideal for bread rolls and special confectionary items
Dimensions	570mm deep, 600mm wide, 1800mm high
Wheels	Adjustable feet
Capacity	Five fixed shelves to accommodate wicker bread baskets

Halstead Fruit & Veg Trolley

Function	Ideal to display fruit and vegetables
Wheels	Front and Back: 75mm
Capacity	Between 4 & 5 plastic lugs
Features	Angle of slope can be adjusted

Five Tier Fruit & Veg Stand

Function	Ideal to display fruit and vegetables
Dimensions	600mm wide, 1800mm high, 570mm deep
Capacity	5 shelves to accommodate plastic lugs
Wheels	Adjustable feet

Egg Trolley

Dimensions	970mm wide, 1807mm high, 970mm deep
Wheels	Front and Back: 125mm heavy duty nylon wheels
Capacity	Can hold 360 dozen eggs
Features	4 fixed shelves and solid back panel top level (for logo)

Header plate available for customised branding.

3-Tier Chromed Bread Trolley

Dimensions	1100mm wide, 485mm deep, 1500mm high
Baskets	3 x deep baskets
Wheels	Front and Back: 100mm swivel
Finish	Chromed

4-Tier Chromed Bread Trolley

Dimensions	1100mm wide, 485mm deep, 1780mm high 550mm deep (incl. basket over run)
Baskets	4 x deep baskets
Wheels	Front and Back: 100mm swivel
Finish	Chromed

5-Tier Chromed Bread Trolley

Dimensions	1005mm wide, 675mm deep, 1825mm high 540mm deep (incl. basket over run)
Baskets	5 x shallow sloping baskets
Wheels	Front and Back: 100mm swivel
Finish	Chromed

7-Tier Chromed Bread Trolley

Dimensions	1005mm wide, 675mm deep, 1925mm high 555mm deep (incl. basket over run)
Baskets	7 x shallow sloping baskets
Wheels	Front and Back: 100mm swivel
Finish	Chromed

SUPERMARKET TROLLEYS

Mr Shelf products only use the finest components that are available and ensure that they have all been tested under the strictest conditions.

All our swivel housing and wheels are manufactured to the highest specifications and are regularly tested to the ISO and the SABS standards.

The plastic tubing that covers the trolley handle is extremely durable and UV treated.

The electro galvanising is applied using ISO and SABS standards.

210 Litre Trolley

Dimensions	Length 1027mm, Width 610mm, Height 1035mm
Weight	25kg
Function	Larger supermarkets and Cash & Carry Stores
Wheels	Front and Back: 125mm
Seat	Plastic baby seat - full length

180 Litre Trolley

Dimensions	Length 965mm, Width 610mm, Height 1040mm
Weight	245kg
Function	Larger supermarkets
Wheels	Front and Back: 125mm
Seat	Plastic baby seat - full length

130/140 Litre Trolley

Dimensions	Length 918mm, Width 610mm, Height 1002mm
Weight	21.6kg
Function	For all supermarkets
Wheels	Front: 100mm swivel wheels Back: 125mm fixed
Seat	Plastic baby seat - short

100 Litre Trolley

Dimensions	Length 816mm, Width 495mm, Height 1003mm
Weight	16.5kg
Function	Liquor stores and smaller supermarkets
Wheels	Front: 100mm swivel wheels Back: 125mm fixed
Seat	No baby seat

85 Litre Trolley

Dimensions	Length 773mm, Width 495mm, Height 967mm
Weight	14kg
Function	High mounted basket for easy loading and unloading
Wheels	Front: 100mm swivel wheels Back: 125mm fixed
Seat	No baby seat

Jumbo Basket Trolley

Handle	320mm long
Wheels	100mm
Swivel	100mm
Capacity	Holds 3 baskets

Standard Basket Trolley

Handle	320mm long
Wheels	100mm (standard) 75mm (Econo)
Capacity	Holds 2 baskets

Chromed Basket Stands

Description	These stands are available with or without castors
Wheels	50mm black plastic
Capacity	Recommended to hold 20 baskets

Jumbo Shopping Baskets

Description	Large basket with comfortable single handle
Colours	Black, Red, Grey, Teal, Blue, Yellow, Green

Handles

Available in various colours
Handles can be customised

Supa Shopa Small

Fittings	This trolley is fitted with two fixed wire baskets
Wheels	Front and Back: 125mm
Capacity	Approx. 120 Litres

Supa Shopa Large

Fittings	This trolley is fitted with two, large fixed wire baskets
Wheels	Front and Back: 125mm
Capacity	Approx. 160 Litres

Supa Shopa Liquor

Item use	Compact liquor trolley where you can store bottles and smaller items on top and your cases of beer or cold drinks below
Wheels	Front and Back: 125mm

Wheelchair Liquor

Item use	Extremely versatile, fitted to majority of wheelchairs Easy to attach, ideal for shoppers confined to a wheelchair
Wheels	Front and Back: 125mm

Kiddies Trolley

Purpose	Ideal for all stores. A winner with kids and mothers alike
Wheels	Front and Back: 75mm
Label	Can be personalised

ELECTRONIC HEAVY DUTY

Electronic Walkie Stacker

Walkie electric pallet trucks are ideal in applications where space is critical and high capacity transporting is necessary.

Most commonly used for low to mid-level selective racking applications such as store rooms, small warehouses or customer zone racking areas.

Electric Pallet Truck

Features

- Excellent manoeuvrability - Turns inside a trailer
- Smooth, step less speed control
- Smooth, regenerative braking
- On-board charger
- Anti roll back
- The best value in a 2000 kg electric pallet truck

Capacity	2000 kg
Raised height	205 mm
Drive motor	24V/2.2kw
Driving speed without load	5 km/hour
Driving speed with maximum load	4 km/hour
Lifting speed without load	60 mm/sek
Lifting speed with maximum load	50 mm/sek
Lifting motor	24V/2.2kw
Battery	12c. 2PzB 126 24V/210/5h
Charger	On-board charger BC1 24V/30h Charging Curve WUIA TB Acid
Steering wheels	Polyurethane
Load wheels	Polyurethane
Aisle width (at loading length of 1200 mm and a safety limit of 200 mm)	2000 mm
Total length	1850 mm
Total width	764 mm
Fork Length	1200 mm
Total width over forks	540 mm/685 m
Turning radius	1667 mm
Gradeability	5% (with maximum load) 7% (without load)

Hand Electric Stacker

Features

- Built in power pack plus battery charger
- Lifting 1000 kg to 1.6m, 2.5m or 3m height
- Compact design low nett weight
- Straddle and adjustable forks available

MANUAL HEAVY DUTY

Hi Lift Pallet Truck

- A combination pallet truck and lift table
- Increase productivity up to 40 - 50 % by picking up pallet loads, transporting them to the work station and lift them up to a convenient working height
- It feeds presses, binders, cutters, conveyors, assembly lines etc
- Prevents back injuries by eliminating all day bending and lifting on a repetitive basis
- Available with electric or manual lift

Maximum capacity	1,000 kg
Maximum height	800 mm
Lowered height	90 mm
Fork length	1 150 mm
Fork widths outside	680 mm, 520 mm
Width of single fork	150 mm
Total length	1 490 mm
Total height	1 210 mm
Steer wheel dimension	150x40 mm
Load wheel dimension	80x50 mm
Available with polyurethane or nylon wheels	

Lift Table

- Heavy-duty steel construction
- Hard-chrome plated pump piston
- Strong metal wheels with polyurethane
- Two fixed wheels, two swivel for easy manoeuvrability
- Two wheel brakes operated by foot pedal
- Conforms with the European CE safety directions
- Available with 3 different lifting capacities

Model	LT- 350	LT- 500	LT- 750	LT- 1000
Load capacity	350 kg	500 kg	750 kg	1000 kg
Lift height	1300 mm	900 mm	1500 mm	1000 mm
Lowest height	395 mm	285 mm	450 mm	410 mm
Dimensions	905x512x55 mm	815x500x50 mm	1220x610x55 mm	1000x512x55 mm
Net weight	113 kg	84 kg	170 kg	114 kg
Please note that LT- 350 and LT- 750 models are double-scissor lifts.				

Hydraulic Drum Picker

Features

- Ideal for transporting steel or L ring plastic drums

Drum Decanter

Features

- For use on forklifts and overhead hoists
- Decants 360 degrees by means of gearbox hand wheel
- Safe loading and stacking of drums
- Models suitable for steel and L ring plastic drums

Drum Grab for Fork Lift

Features

- Single and double drum lifter
- Suitable for 210L steel or L ring plastic drums
- Stacks and off loads drum quickly and safely

Manual Stacker with Drum Decanter

Features

- Hydraulic hand/foot pump
- Lifting 350kg to 1.42m lift height
- Suitable for steel or L ring plastic drums
- Safe loading and stacking of drums

Order Picker

Features

- Battery powered lift
- Simplifies order pricing
- From 3m to 4.5m
- Spacious storage platform Safe loading and stacking of drums

Hand Manual Stacker

Features

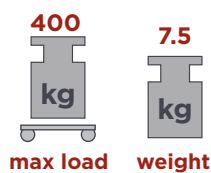

- Manual propelled stacker
- Hand and foot pump
- Easy hand operated lowering lever
- Lifting: 1000 kg to 1.6m height
1500 kg to 1.6m height

DOLLIES

Dollies are low mobile platforms used for transporting bulky loads. Equipped with heavy duty castors these are suitable for use at every stage of the supply chain and are an integral part of an efficient industrial operation.

- Highly manoeuvrable with wheels and solid base.
- Good flexibility
- Secure structure improves safety.
- Effective means of moving and transporting product.
- The dolly is designed to accommodate two 600 x 400 mm crates, side by side.

Code:	W080
Material:	Polypropylene
Ext. Top:	800 x 600 x 200 mm (H)
Edge Height:	12 mm
Carrying Load:	400 kg
Max Load on Base:	400 kg
Stack Height:	150 mm
Nest Height:	N/A
Colour:	■

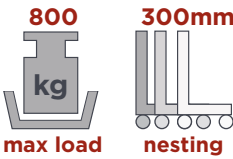

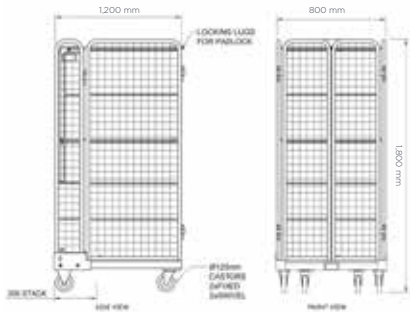

ROLLTAINERS

Mr Shelf offers a range of standard user friendly Rolltainers - Single Door and Two Door Nesting Rolltainers. Rolltainers are foldable to save warehouse space and on return transportation costs.

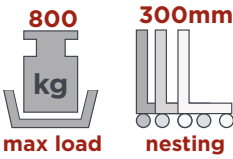

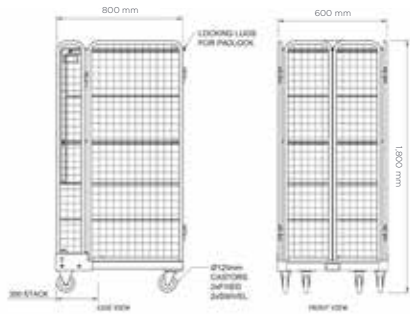

Two Door Nesting Rolltainer (Large)

Code:	TWRLARGE06
Colour	Bright Galvanised
Dimensions	1,800mm H x 1,200mm L x 800mm W
Max Load	800kg
Wheels	125 mm Castors (2 x Swivel & 2 x Fixed)
Mesh	50 x 50 x 3.15
Shelf	1 x Inner
Nesting	300mm
Locking	Lugs for Padlocks and/or Security Tags

Two Door Nesting Rolltainer (Small)

Code:	TWRSMALLO30
Colour	Bright Galvanised
Dimensions	1,800mm H x 800mm L x 600mm W
Max Load	800kg
Wheels	125mm Castors (2 x Swivel & 2 x Fixed)
Mesh	50 x 50 x 3.15
Shelf	1 x Inner (middle)
Nesting	300mm
Locking	Lugs for Padlocks and/or Security Tags

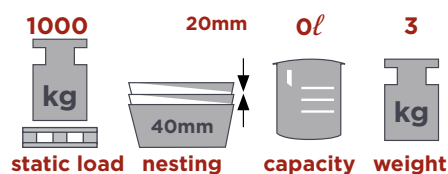

PLASTIC PALLETS

The diverse selection includes standard-sized hygiene pallets as well as our more innovative, nestable designs. These lightweight pallets are robust and offer an efficient alternative to existing wooden products.

- Reusable and Recyclable
- Hygienic and easy to clean
- Complex honeycomb design provides even weight distribution
- Waterproof, inert and splinter free
- Forklift-friendly with 4-way entry
- Ideal for food and wine exports
- HACCP compliant
- Export friendly
- Competitively priced
- Vertical stacking up to four loaded units
- Easy to clean

Pallet Stringer

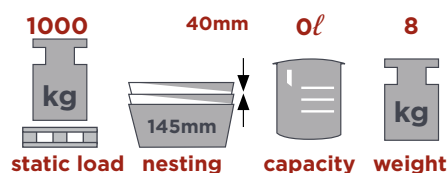

Code:	CT6001
Material:	Polypropylene
Ext. Top:	1110 x 915 x 40 mm (H)
Int. Base:	N/A
Dynamic Load:	1000 kg
Static Load:	1000 kg
Stack Height:	N/A
Nest Height:	50%
Colour:	Green, Black

Features

- Clips onto the nestable pallet to give extra rigidity
- Spreads load when stacking pallets

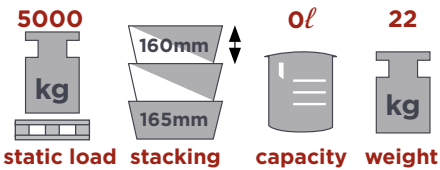

Nestable Pallet

Code:	CT6000
Material:	Polypropylene
Ext. Top:	1200 x 1000 x 145 mm (H)
Int. Base:	N/A
Dynamic Load:	1000 kg
Static Load:	1000 kg
Stack Height:	145 mm
Nest Height:	72%
Colour:	Green, Black

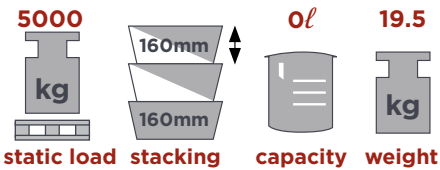

Slip Resistant Pallet CR3-5-R

Code:	MP4708
Material:	HDPE
Ext. Top:	1200 x 1000 x 160 mm (H)
Int. Base:	N/A
Dynamic Load:	1250 kg
Static Load:	5000 kg
Racking Load:	1000 kg
Stack Height:	160 mm
Nest Height:	N/A
Colour:	■

Pallet D3 ECO

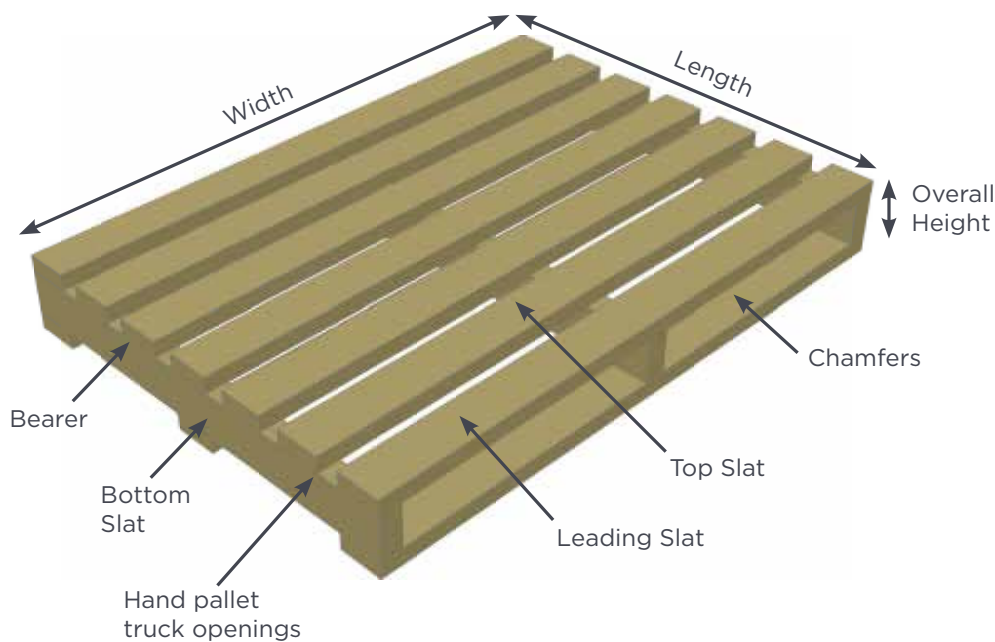

Code:	MP4709
Material:	HDPE
Ext. Top:	1200 x 1000 x 160 mm (H)
Int. Base:	N/A
Dynamic Load:	1000 kg
Static Load:	5000 kg
Racking Load:	400 kg
Stack Height:	160 mm
Nest Height:	N/A
Colour:	■

WOODEN PALLETS

Mr Shelf Pallets and Decks are milled from Renewable Forests in the Mpumalanga area. The timber is sawn and graded at reputable Saw Mills (FSC Graded) and is kiln dried (heat treated) as per ISPM 15 Regulation which is required for the manufacture of boxes, crates etc. for export purposes and is recognised as one of the treatments used world wide.

This system is designed for your specific storage application.

SPILL CONTAINMENT

Spill Bunded Pallets

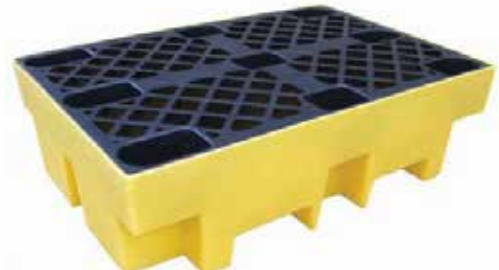

Spill Pallets are for outdoor and indoor use and have a large bunding capacity making them an ideal solution for the safe storage of drums containing oils, fuels and other fluids. Manufactured from 100% recyclable structural grade polyethylene, they are hard wearing and have been design to be fully compliant with Oil Storage Regulations helping you to protect your work environment.

Spill Pallet for 2 x 205 ltr drums - BP2

Made from 100% polyethylene this spill pallet is fully complaint with regulations and has broad range chemical compatibility.

This model is suitable for the storage of 2 x 205ltr drums and features a removable plastic grid for easy cleaning and forklift pockets to aid transportation.

Description	Dimensions
Length	1220 mm
Width	820 mm
Height	330 mm
Weight	23 kg
Sump	240 ltr
UDL	650 kg

IBC Spill Pallet for 1 x 1000 ltr IBC (no deck) - BB3

Manufactured from 100% corrosion free polyethylene for broad chemical comparability this single IBC secondary containment spill pallet is ideal for 1 x 1000ltr IBC. It has integral support columns, instead of decking, as well as fork pockets and is fully compliant with all UK, EC and Worldwide bunding regulations.

Description	Dimensions
Length	1590 mm
Width	1455 mm
Height	715 mm
Weight	77 kg
Sump	1125 ltr
UDL	1500 kg

Low Profile Spill Pallet for 4 x 205 ltr drums - BP4L

A robust 100% polyethylene spill pallet fully compliant with regulations.

This low profile model is suitable for the storage of 4 x 205 ltr drums and features a removable plastic grid for easy cleaning and forklift pockets to aid transportation.

Description	Dimensions
Length	1280 mm
Width	1280 mm
Height	275 mm
Weight	29 kg
Sump	230 ltr
UDL	1250 kg

Spill Pallet for 8 x 205 ltr drums - BP8

A large capacity spill pallet suitable for up to 8 x 205ltr drums, or 2 x 1000ltr IBC's, easy to clean, tough and durable this model is fully compliant with all regulations.

Description	Dimensions
Length	2560 mm
Width	1350 mm
Height	510 mm
Weight	116 kg
Sump	1140 ltr
UDL	2500 kg

Spill Bunded Flooring

Bunded Floors provide you with a safe and cost effective solution for the safe storage of drums in internal dispensing areas. Bunded floors are versatile and can be linked together helping you to maximise productivity from the space available.

All our bund flooring is manufactured from 100% polyethylene for broad range chemical compatibility and this model features a removable plastic grid to allow you to reclaim and clean-up liquids easily.

An optional ramp for loading and unloading is available and if joining units together a joining strip cover can be purchased for a superior finish.

Bund Flooring with 130 ltr sump - BF 2

The BF2 floor unit can be used alone to store up to 4 x 100 ltr drums or linked with additional units to create a larger workstation.

Description	Dimensions
Length	1260 mm
Width	860 mm
Height	150 mm
Weight	20 kg
Sump	130 ltr
UDL	1000 kg

Bund Flooring with 300 ltr sump - BF 4

The BF4 floor unit can be used alone to store up to 4 x 205 ltr drums or combined with other sections to create a larger workstation.

Description	Dimensions
Length	1660 mm
Width	1260 mm
Height	150 mm
Weight	38 kg
Sump	300 ltr
UDL	2000 kg

Flow Bins

Specifications

Dimensions:	MX1000 1200mm L x 1350mm H x 1000mm W
Material - Inner:	Extrusion blow-moulded HDPE
Dry Weight:	65kg
Material - Outer:	Galvanised tubular steel
Bottom Plate:	Steel plate to provide stability and to facilitate minimum residual contents from the inner container
Filling Opening:	DN 150 with screw cap
Outlet Valve:	DN 50 butterfly valve/ball valve
Stacking Density:	< 1.5 (2 High) > 1.5 (1 High)
Stacking Static:	4 High
Colour Coding:	<div> <div>Corrosive</div> <div>Reactive/Oxidiser</div> <div>Flammable</div> <div>Toxic</div> <div>Reagent</div> </div>

Certification

- UN31 HA1/Y: Maximum density 1.9
- FDA (OPTIONAL): Safe for food products
- Approved for filling products of a maximum density of 1.9
- Perfectly suited for high bay warehousing (specially reinforced bottom plate prevents deflection)
- Can be stacked up to 4-high
- Reinforced, wrapped resistant tubular steel grid jacket.
- Additional corner guards to protect the inner container

Colour coded flow bins

- Customising the colour coding of your bin to suite your specific needs and requirements
- Using a colour code table system to identify certain aspects of chemical compositions assisting in the prevention of cross contamination
